Dear Northern Territory Government. Please Stop Killing The Environment And The Planet. NT Government.. This is a Shocking "Deal" Signing the NT up to buy risky fracked gas from a pilot project being proposed by Tamboran Resources - even though the project hasn't yet been fully assessed or approved by the NT Government itself. If approved, this fracking proposal will.. Use 950 million litres of precious groundwater, Create 35 million litres of toxic wastewater for EACH WELL that will need to somehow be safely disposed of, and Produce hundreds of thousands of downstream carbon emissions every year. This is what one of the existing exploration wells at Carpentaria looked like just a few weeks ago - open ponds and water running everywhere. This cannot keep on happening, it is completely Unacceptable. Please Reconsider Environmentally Destructive Projects,, These Are Not "Projects",, They Are "Environmental Destroyers"... Not Good For Anyone or The Planet.. Except For All Those Involved \$\$\$.. Thank You Kind Regards Mrs P. Thurston.
