Submission contents

Submission details:

This proposal uses 4 million litres of water & has a 19,150ha footprint. Will there be cultural and environmental considerations and protections put in place? Muranji Station has 9 threatened species. What will be done to protect these species? Gas-fired power station- the largest in Australia. Will this be using fracked gas as well? What other climate change mitigation strategies are in place? These questions must be addressed adequately before work can proceed.
