Project director	Dan Moriarty, Tara Halliday		
Project manager	Rebecca Powlett		
Version:	Details:	Approved:	Date:
CR 9014_07_v1	Initial draft to client	Daniel Moriarty	October 2009
CR 9014_07_v2	Second draft to client	Daniel Moriarty	November 2009
CR 9014_07_v3	Final for exhibition	Daniel Moriarty	November 2009

Guide to the Wonarah Phosphate Project Draft Environmental Impact Statement

The EIS comprises four volumes:

- Executive Summary.
- Main Report.
- Appendices Volume 1.
- Appendices Volume 2.

CONTENTS

1.	INTRO	DUCTIO	N	1-1
	1.1	Backgro	bund	1-1
	1.2	Project	History	1-1
	1.3	Project	Proponent	1-3
	1.4	Project	Location and Tenure	1-3
		1.4.1	Land Tenure	1-4
		1.4.2	Mining Tenements	1-4
	1.5	This Dra	aft Environmental Impact Statement	1-4
		1.5.1	Legislative Context	1-4
		1.5.2	Objectives and Context	1-4
		1.5.2	Structure of the EIS	1-6
		1.5.3	Report Conventions	1-8
2.	LEGIS	SLATIVE F	FRAMEWORK	2-1
	2.1	Australia	an Government Legislation	2-1
		2.1.1	Environment Protection and Biodiversity Conservation Act	2-1
		2.1.2	Native Title Act and Aboriginal Land Rights (Northern	
			Territory) Act	2-1
	2.2	Norther	n Territory Legislation	2-2
		2.2.1	Mining Act and Mining Management Act	2-4
		2.2.2	Environmental Assessment Act	2-4
		2.2.3	Water Act	2-5
		2.2.4	Northern Territory Aboriginal Sacred Sites Act	2-5
		2.2.5	Other Relevant Legislation	2-5
	2.3	Local G	overnment	2-7
		2.3.1	NT Planning Scheme	2-7
		2.3.2	Barkly Shire Council	2-7
	2.4	Standar	ds and Codes of Practice	2-7
3.	PROJECT RATIONALE		3-1	
	3.1	Project	Objectives	3-1
		3.1.1	Commercial Objectives	3-1
		3.1.2	Environmental Objectives	3-2
		3.1.3	Social Objectives	3-2
	3.2	Norther	n Territory Context	3-2
	3.3	Socio-e	conomic Benefits of the Project	3-3
		3.3.1	Economic Benefits	3-3
		3.3.2	Social Benefits	3-4
	3.4	Alternat	ives	3-5
		3.4.1	Not Proceeding with the Project	3-5
		3.4.2	Alternative Locations for the Project and Infrastructure	3-6
		3.4.3	Alternative Mine Closure and Rehabilitation Options	3-7
		3.4.4	Alternative Sources of Raw Materials	3-8

		3.4.5	Alternative Transport Options	3-8
		3.4.6	Alternative Extraction and Treatment Technologies	3-9
		3.4.7	Alternative Environmental Management Technologies	3-9
4.	ENVI	RONMENT	AL AND SOCIO-ECONOMIC SETTING	4-1
	4.1	Landsca	ape	4-1
	4.2	Climate		4-1
	4.3	Surface	Water	4-4
	4.4	Ground	water	4-4
	4.5	Land Us	se	4-5
	4.6	Flora an	nd Fauna	4-5
	4.7	Cultural	Heritage	4-6
	4.8	Air Qual	lity and Noise	4-6
	4.9	Socio-e	conomic Environment	4-6
5.	PROJ	ECT DES	CRIPTION	5-1
	5.1	Project	Overview	5-1
	5.2	Project	Schedule	5-1
		5.2.1	Construction Schedule	5-1
		5.2.2	Mining Schedule	5-5
		5.2.3	Future Exploration and Expansion	5-7
	5.3	Geology	/ and Resources	5-9
		5.3.1	Deposit Geology	5-9
		5.3.2	Resource Estimates	5-14
		5.3.3	Deposit Geochemistry	5-14
		5.3.4	Radiation	5-15
	5.4	Project	5-15	
	5.5	Mining F	5-16	
	5.6	Waste F	Rock Storage	5-20
	5.7	Treatme	5-21	
	5.8	Water M	lanagement	5-21
		5.8.1	Surface Water Management	5-21
		5.8.2	Water Use	5-22
		5.8.3	Borefield	5-23
	5.9	Transpo	ort Infrastructure	5-23
		5.9.1	Access Road	5-23
		5.9.2	Haul Roads and Other Site Roads	5-24
	- 10	5.9.3	Aerodrome	5-24
	5.10	Ore Sto	rage and Transport to Market	5-24
		5.10.1	Foot Arm Dort	5-26
	- 44	5.10.2	East Arm Port	5-26
	5.11			5-26

1.1	Location of the Wonarah Phosphate Project	1-2
1.2	Land tenure	1-5
2.1	Wonarah Phosphate Project permitting process	2-3
4.1	Bioregions	4-2
4.2	Wind speed, temperature, rainfall and evaporation rates for Wonarah and Brunette Downs	4-3
5.1	Project area layout	5-2
5.2	Main Zone mine layout	5-3
5.3	Arruwurra mine layout	5-4
5.4	Wonarah schedule	5-6
5.5	Future exploration area	5-8
5.6	Stratigraphic column of the regional geology	5-10

5.7	Long section through Arruwurra deposit	5-11
5.8	Long section through Main Zone deposit	5-13
5.9	Strip mining process	5-18
5.10	Wonarah Phosphate Project ore transport route to multi-user hub	5-25
5.11	Layout of accommodation village	5-29
6.1	Morning and afternoon wind direction and speed recorded at the Wonarah BoM station 1957 to 1974	6-4
6.2	Dust deposition monitoring locations	6-6
6.3	Sensitive receptors along the ore transport route – air	6-8
6.4	Sensitive receptors along the ore transport route – noise	6-22
6.5	Soil classifications in the project area	6-30
6.6	Vegetation communities of the project area	6-44
6.7	Threatened flora in the project area and surrounds	6-46
6.8	Threatened fauna in the project area and surrounds	6-60
6.9	Location of project production and monitoring bores	6-77
6.10	Predicted groundwater drawdown	6-86
6.11	Regional catchments, major rivers, sampling sites, elevation and estimated flow paths (close up view)	。 6-91
6.12	Archaeological sites in the project area	6-126
8.1	Closure domains	8-5
8.2	Arruwurra closure domains	8-6
8.3	Main Zone closure domains	8-7
9.1	Minemakers' environmental policy	9-2

Tables

1.1	Wonarah Phosphate Project EIS supporting documentation	1-7
2.1	Standards and codes of practice	2-7
5.1	Proposed pit working schedule	5-5
5.2	Mining schedule	5-7
5.3	Wonarah phosphate project inferred resources	5-14
5.4	Project components and approximate footprints	5-16
5.5	Pit details	5-19
5.6	Waste rock storage details	5-20
5.7	Water requirements	5-22
5.8	Solid waste management procedures	5-32
6.1	Descriptors used to classify likelihood and consequence measures of impact	6-2
6.2	Qualitative risk analysis matrix	6-3
6.3	Summary of seasonal wind conditions	6-5
6.4	Environmental air quality objectives and goals	6-12
6.5	Summary of residual impacts on air quality	6-13
6.6	Outcome and assessment criteria – air quality	6-16
6.7	Estimated annual diesel fuel consumption and greenhouse gas emissions	6-19
	Coffey Natural Systems 9014_7_TOC_v3.doc vii	

6.8	Estimated annual greenhouse gas emissions CO2-equivalent (Mt/a)	6-19
6.9	Summary of impacts resulting from greenhouse gas emissions	6-20
6.10	Project-related traffic noise	6-24
6.11	Summary of noise and vibration impacts	6-25
6.12	Outcome and assessment criteria – noise and vibration	6-28
6.13	Summary of land resources impacts	6-35
6.14	Outcome and assessment criteria – landform and soils	6-37
6.15	Summary of land use impacts	6-39
6.16	Outcome and assessment criteria – land use	6-40
6.17	Dominant flora within the major vegetation communities for the Mineral Lease	6-45
6.18	Species of regional and local significance in the project area	6-47
6.19	Summary of impacts and risks to flora	6-52
6.20	Outcome and assessment criteria – flora	6-56
6.21	Fauna survey method and effort at each site	6-59
6.22	Birds of conservation significance with the potential to occur in the project area	6-61
6.23	Summary of impacts to fauna	6-69
6.24	Outcome and assessment criteria – fauna	6-74
6.25	Water quality analysis results	6-79
6.26	Third party bores in the project area	6-81
6.27	Summary of impacts to groundwater	6-84
6.28	Groundwater monitoring schedule	6-87
6.29	Outcome and assessment criteria – groundwater	6-88
6.30	Regional flow data for rivers near the project area	6-92
6.31	Percentage probability of N-Year Average Recurrence Interval (ARI) flood event occurring	6-95
6.32	Summary of surface water impacts	6-99
6.33	Outcome and assessment criteria – surface water	6-102
6.34	Community profile and demographic indicators	6-111
6.35	Summary of socio-economic impacts	6-117
6.36	Outcome and assessment criteria – socio-economic	6-122
6.37	Summary of archaeological survey transects	6-125
6.38	Summary of Indigenous cultural heritage impacts	6-129
6.39	Outcome and assessment criteria – Indigenous cultural heritage	6-131
6.40	Summary of traffic impacts	6-136
6.41	Changes in net traffic headway for all vehicle classes	6-137
6.42	Class 12 vehicle increase related to ore transport throughput	6-137
6.43	Outcome and assessment criteria – traffic and transport of ore	6-138
7.1	Descriptors used to classify likelihood and qualitative measures of impact	7-2
7.2	Qualitative risk analysis matrix	7-3
7.3	Hazard assessment	7-4
8.1	Proposed land uses for each domain after closure	8-8
8.2	Closure outcomes and completion criteria	8-9

8.3	Residual risks for each domain	8-13
8.4	Summary of estimated closure costs	8-15
8.5	Schedule for rehabilitation of each domain	8-16
9.1	Environmental management responsibilities	9-3
9.2	Indicative timeframes for response and containment of typical complaints	9-5
10.1	Summary of stakeholder consultation to date	10-5

Plates

4.1	Rocky outcrops common in the project area	4-8
4.2	Typical ephemeral drainage line in the project area	4-8
4.3	The project area after fire showing Spinifex regrowth	4-8
4.4	Vegetation in the project area after good wet season rains	4-9
4.5	Barkly Highway	4-9
4.6	Wunara community	4-9
6.1	Typical landform at Wonarah	6-29
6.2	Typical rocky outcrop at Wonarah	6-29
6.3	Tennant Creek police station	6-107
6.4	Tennant Creek fire station	6-107
6.5	St John Ambulance Barkly Region	6-107
6.6	Tennant Creek primary school	6-108
6.7	Main street of Tennant Creek	6-108
6.8	Typical weatherboard house in Tennant Creek	6-108
6.9	BRADAAG Sobering Up Shelter	6-110
6.10	Houses within the Wunara community	6-110
6.11	Communal area within the Wunara community	6-110
7.1	Post-fire woodland and access track at Wonarah	7-13
7.2	Post-fire woodland at Wonarah	7-13
