

# **WHITE BINS WASTE REMOVAL**

## **Emergency Response Plan**

This emergency response plan has been prepared to instruct driver(s) should an incident/accident occurs during the transportation of ACM.

### **Plan activation**

On the occasion of an asbestos spill due to an incident/accident during transportation the following steps should be taken.

- Pull vehicle over to a safe area if and when applicable.
- Assess scene for potential dangers including other traffic.
- Where possible use traffic cones provided to minimise safety risk.
- Notify any other parties present of the risks of the ACM being transported.
- Implement an exclusion zone if necessary using contents of kit supplied in the truck.
- Assess damages/spills
- If spills are packaged and undamaged reload appropriately.

In the case the spill is no longer contained in certified packaging

- If spills have broken loose from packaging and cannot safely be reloaded contact licenced certified Emergency Response Crew listed below and await further instruction.
- Notify NTPFES 131444 or 000
- Notify Worksafe 1800 019 115
- Notify NT EPA pollution hotline 1800 064 567
- Notify management 0429313141

Emergency response crew

- Asbestos solutions NT 0451 832 064
- If the emergency contact is unavailable contact management for further instruction.
