

## ENVIRONMENTAL MANAGEMENT PLAN

The aim of this environmental management plan is to ensure compliance with environmental legislation and that all environmental risks associated with our projects are properly managed. Tap & Drain Dr NT use a safe work method statement (SWMS) to breakdown the requirements of each project to ensure that appropriate environmental management practices are followed during a project.

## Accreditation and the relevant standards?

Tap & Drain Doctor is committed to protecting the environment and although not ISO credited, we conform with the requirements our clients and the expectation that we will always provide the 3 most basic commitments:

- Comply to legal environmental requirements
- Prevention of pollution
- Continual improvement

## Managing aspects of applicable plan?

As above, Tap & Drain Doctor continuously examines its activities, products and the services we provide and ensures that there is minimal or no environmental impact when performing works. We adhere to our own environmental policy which ensures legal requirements i.e. permits and licences are adhered to. If any changes to any legal requirements are required we ensure that the relevant procedures and work instructions are revised.

Tap & Drain Doctor ensures that we consider all significant environmental aspects when setting environmental objectives

and targets. The company may also set objectives and targets based on:

- Environmental Policy;
- Relevant legislation;
- Views of any interested parties; and
- Need to prevent pollution in general.

Our Contractors and employees are required to:

Through training we are able to ensure that all staff are trained in the specific environmental impacts and responsibilities of their jobs, in emergency procedures and in the potential consequences of departing from the specific procedures.

Where a job has the potential to cause significant environmental impacts, care is taken that job holders are competent to do the job.

## Environmental Policy and sustainability solutions?

Tap & Drain Doctor NT are committed to providing a quality service in a manner that ensures a safe

and healthy workplace for our employees and minimises our potential impact on the environment. We will operate in compliance with all relevant environmental legislation and we will strive to use pollution prevention and environmental best practices in all we do.

Our Policy & Sustainability Solutions include to:

- integrate the consideration of environmental concerns and impacts into our decision making and activities,
- minimise our waste and then reuse or recycle as much of it as is possible.
- minimise energy and water use within our buildings and processes in order to conserve supplies and minimise the consumption of natural resources.
- As far as is possible, purchase products and services that do the least damage to the environment.
- train, educate and inform our employees about environmental issues that may affect their work,
- promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner,
- communicate our environmental commitment to clients, customers and the public and encourage them to support it
- where required by legislation or where significant health, safety or environmental hazards exist, develop and maintain appropriate emergency and spill response programs

## Environmental Management Structure

**PLAN – Goals and Objectives, Environmental Management Plan.**

**DO – Implementation, Training and Education.**

**CHECK – Monitoring, Internal/External Audits.**
