Subject: Singleton Horticulture Project
Date: Monday, 13 February 2023 1:49:39 PM

Submission contents:

The environmental impacts of this project should have formal environmental assessment.

The potential increase in soil and ground water salinity and the consequent viability of the project should be a major part of the environmental assessment.

The assessment report should be in a shorter and more easily understood form than the referral documents already submitted. Some of the technical detail in the referral documents can only be realistically assessed by persons familiar with the preparation and writing of such reports
