Good Afternoon

CM&C acknowledges the significant work to date undertaken by SunCable to plan to meet the environmental objective to *'Enhance communities and the economy and foster resilience to a changing climate, for the welfare, amenity and benefit of current and future generations of Territorians.'*

Broadly, CM&C suggests minor changes to the ToR to strengthen the drafting of an EIS including:

- additional information as part of social and economic impact assessments, including local business benefits (which may be already underway and can be satisfied by including the Territory Benefits Plan)
- the development of a stakeholder engagement strategy
- a commitment to undertake a pre-closure/decommissioning assessment

Please feel free to contact [REDACTED] for any further clarification.

Thank you
