| <p>Condition 21,23: flow of discharge has not been monitored continuously.</p> <p>Power and Water have always been transparent with the Department of Environment, Parks and Water Security (DEPWS) that many remote wastewater sites are unmetered. The cost of metering remote sites is significant as often power is not available and Power and Water was required to source additional funding for the project and was subject to approval from IES through the budgetary process that is not aligned to the licence requirements, which subsequently resulted in being non-compliant from the date the licences were issued.</p> <p>Flow meter instrumentation has since been installed at the Belyuen authorised discharge point in 2021. Installation of remote telemetry systems and contract set up has been completed. Flow data will now be available at this site going forward in the next financial year.</p> <p>Condition 34: Exceedance of trigger values in Woods Inlet.</p> <p>Exceedances of trigger values have been recorded as expected following implementation of this condition into the licence. Further monitoring is required to determine the extent of these exceedances.</p> |
