I m a citizen of this planet who wants to see it healed not continuously destroyed. There is enough damning evidence for the case against FRACKING that I shouldn't have to be asking our government yet again to cease this water polluting , soil killing and human health damaging practice ! Simply- STOP! Also , the clean up bill for damages as seen in America is enormous -so let's not continue to go down this path by expanding this toxic industry as we tax payers will yet be doing the payout . Yours sincerely K Cross
