
INTEGRATED MANAGEMENT SYSTEM

Environmental Policy

NTRS recognises its role in establishing and maintaining effective environmental management principles in all aspects of its operations. The organisation is committed to the protection of the environment, including the prevention of pollution and understands the importance of sustainable development. NTRS encourages its workers, contractors, and other stakeholders to understand and respect the environment in which they operate.

Legal Compliance

In implementing a responsible environmental management program, ntrs ensures that all employees and contractors are familiar with legislation and regulations and work in partnership with the responsible authorities and site owners.

Product Stewardship

We will employ management systems and procedures specifically designed to minimize the use of hazardous materials, energy, and other natural resources, to minimize the generation of waste, and to enable recycling and reuse of materials. All employees and contractors are trained in monitoring and controlling noise levels, waste management, use of resources and emissions. Visitors are encouraged to better understand, respect, and enjoy the environment they are temporarily sharing.

Involvement and Communication

We will promote participation and communicate our commitment to responsible environmental management by promoting environmental responsibility among our employees and sub-contractors by:

- providing the necessary training and support to enable them to implement this policy
- informing suppliers of our environmental policy and encouraging them to adopt effective environmental management practices
- soliciting input from our employees, sub-contractors, suppliers and customers in meeting our environmental goals

In implementing this environmental management policy, NTRS maintains appropriate documented evidence and conducts an annual review of its effectiveness and performance.

Continual Improvement

We will continually seek opportunities to improve our environmental performance by establishing objectives and targets, measuring progress, and reporting our results.
