Are you making this submission on behalf of an organisation: No

If yes, please enter the name of the organisation:

Submission contents

Submission details:

We don't know enough about these massive data centres. The NT should take a back seat and wait for the Feds to complete their assessments. We have jumped into so many other projects without proper consultation or not adopting all recommendations and have turned the NT into a ses pit! Toxins from PFAS, toxins from Mt Todd, toxins from Rum Jungle, toxins from Inpex. Toxins from Fracking, Toxic sale of Darwin Port - just stop and do your homework! When the MP says too much water will alter the earths axis and the Chief says that the Feds should keep their nose out of our business it is extremely worrying. Stop with the haste and start thinking about the population - this generation and the next! Keep our water and stop with the green house gasses!
