<b>GENERAL COMMENTS (delete if not applicable)</b>
<a href="#">Currently we are residents of the area – and only discovered this report today 31-5-15 from information provided by Greening Australia at the tropical Garden Spectacular at the Darwin Botanical Garden. It is important that the Sand plains are protected because of their uniqueness– I am only just starting to understand how unique they are... and what a gem of hidden tiny treasures we have in our back yard that has gone unnoticed by the majority.</a>
<a href="#">The region deserves serious consideration by the government because of the endangered plants and animals and their importance on a world level – biodiversity is essential to keeping an environment healthy.</a>
<a href="#">The local community needs to be made aware of the issues to be part of the solution as well.</a>
<a href="#">Mining Sand is important as well to keep construction/building continuing but ‘cheap’ sand should not be used as an excuse to wipe out endangered species.</a>
<a href="#">Greening Australia advocates deserve a round of applause for helping arouse interest in these delicate areas.</a>
<a href="#">Keep the good work up and protect this valuable environment</a>
