To whom it may concern

Dear Sir/Madam

The Darwin Port development has an extremely low risk factor for Bush Fires. Given that most of the occupied area and the new development is and will be gained from filling reclaimed areas and danger from wild fire will be a management dysfunction caused by allowing the uncontrolled growth of invasive weed grasses. The existing facilities are already hosting colonies of the various fire causing weeds if this is allowed to continue all the new land fill sites will suffer a similar fate

Yours sincerely

Patrick Skewes  
Hazard Reduction Officer
