**Subject:** Little Mindil developing plans

As a longtime citizen of Darwin since 1968 I strongly oppose and protest the development plans for Little Mindil. If successful, those plans will deprive the public (and me) of access to one of the last remaining public beaches in Darwin. The several meters high fill-up will be an ecological crime and will result in necessary tunneling of the natural creek. Also please, be aware this is a century old aboriginal cemetery, which will be desecrated. Remember the public outcry of similar criminal developments (Rio Tinto)!
