Hello,

I am both distressed and highly concerned by the proposed land clearing and voluminous amounts of ground water to be used for the next 30 years. The Singleton horticulture proposal poses risk of serious, irreversible environmental harm including to groundwater dependent ecosystems, sacred sites, habitat for threatened species, including the Bilby.

I urge the NTEPA to ensure that all groundwater dependent ecosystems are fully protected and that our precious and unique flora and fauna is safeguarded now and for future generations.

Thank you for reading my submission.

Yours sincerely,  
Kerry Rainer
