

VOLUME 1

GLOSSARY

EXECUTIVE SUMMARY

1	Introduction-----	1-1
1.1	Overview	1-1
1.2	EIS Objective	1-2
1.3	Proponent Details	1-2
1.4	Project	1-3
1.4.1	Current Operations	1-3
1.4.2	Proposed Expanded Operations	1-3
1.5	Project Schedule	1-4
1.6	EIS Approval Process	1-5
1.7	Planning Issues and Statutory Requirements	1-6
1.7.1	Statutory Requirements	1-6
1.7.2	Non-Statutory Commitments	1-7
1.8	Report Structure	1-8
2	Project Need and Benefits-----	2-1
2.1	Aluminium Industry	2-1
2.2	Project Need	2-2
2.3	Project Benefits	2-2
2.3.1	Social Benefits	2-2
2.3.2	Environmental Benefits	2-2
2.3.3	Economic Benefits	2-3
3	Description of Existing Operation-----	3-1
3.1	Site Location	3-1
3.2	Existing Leases	3-1
3.3	Overview of Existing Operation	3-2
3.4	Mine	3-3
3.4.1	Location	3-3
3.4.2	Geology	3-3
3.4.3	Mining	3-4
3.4.4	Crushing and Screening	3-4
3.4.5	Rehabilitation	3-5
3.5	Refinery	3-5
3.5.1	Bauxite Stockpiles	3-6
3.5.2	Grinding and Digestion	3-6
3.5.3	Residue Separation, Filtration and Washing	3-6
3.5.4	Precipitation	3-7
3.5.5	Classification and Filtration	3-7
3.5.6	Calcination and Alumina Storage	3-7
3.5.7	Evaporation	3-8
3.5.8	Lime Plant	3-8
3.6	Residue Disposal	3-9
3.6.1	Residue Characterisation	3-9
3.6.2	Residue Management	3-10

3.6.3	Waste Water Management	3-10
3.6.4	Pond Design and Management	3-11
3.7	Port	3-12
3.8	Input Materials	3-13
3.8.1	Bauxite	3-14
3.8.2	Caustic Soda	3-14
3.8.3	Lime	3-14
3.8.4	Acids	3-14
3.8.5	Flocculants and Reagents	3-14
3.8.6	Fuel Oil	3-14
3.8.7	Diesel	3-14
3.8.8	Unleaded Fuel	3-15
3.8.9	Seawater	3-15
3.8.10	Fresh Water	3-15
3.8.11	Fabric Filters	3-15
3.8.12	Grinding Balls and Rods	3-15
3.9	Output Products	3-15
3.9.1	Alumina	3-15
3.9.2	Bauxite	3-15
3.9.3	Electricity	3-15
3.10	Workforce and Accommodation	3-16
4	Expanded Operation -----	4-1
4.1	Expansion Projects	4-1
4.2	Mine	4-2
4.2.1	Expansion	4-2
4.2.2	Mining Operations	4-2
4.2.3	Crushing and Screening	4-6
4.2.4	Overland Conveyor	4-6
4.3	Refinery	4-6
4.3.1	Bauxite Stockpiles and Handling	4-6
4.3.2	Grinding	4-7
4.3.3	Digestion	4-7
4.3.4	Residue Separation, Filtration and Washing	4-8
4.3.5	Precipitation	4-8
4.3.6	Classification and Filtration	4-8
4.3.7	Calcination	4-8
4.3.8	Alumina Storage	4-9
4.3.9	Evaporation	4-9
4.3.10	Lime Plant	4-9
4.3.11	Plant Infrastructure	4-9
4.3.12	Refinery Inputs	4-10
4.3.13	Refinery Outputs	4-11
4.4	Liquor Purification	4-11
4.4.1	Purpose	4-11
4.4.2	Inorganic Removal Plant	4-11
4.4.3	Organic Removal Plant	4-11
4.4.4	Plant Emissions	4-12
4.5	Waste Water Inventory Reduction	4-12
4.5.1	Background	4-12
4.5.2	Overview	4-13
4.5.3	Neutralisation Plant	4-13

4.5.4	Implementation Program	4-13
4.6	Residue Disposal	4-15
4.7	Port	4-16
4.8	Workforce and Accommodation	4-16
4.9	Construction Activities	4-17
4.9.1	Pre-Construction Phase	4-17
4.9.2	Pre-Assembly Modules	4-17
4.9.3	On-Site Construction	4-19
4.9.4	Construction Workforce	4-20
4.9.5	Infrastructure	4-20
4.9.6	Construction EHS Environmental Management Plan	4-20
4.9.7	Tie-in and Commissioning	4-21
4.10	Gas Conversion	4-21
4.10.1	Heads of Agreement	4-21
4.10.2	Pipeline	4-22
4.10.3	Timeframe	4-22
5	Infrastructure-----	5-1
5.1	Water Supply	5-1
5.1.1	Water Source	5-1
5.1.2	Existing Wellfield	5-1
5.1.3	Current Water Usage	5-2
5.1.4	Administrative Arrangements	5-2
5.1.5	Third Stage Expansion Water Demand	5-2
5.1.6	Construction Phase Demand	5-3
5.1.7	Wellfield Demand	5-3
5.1.8	Wellfield Modelling	5-4
5.1.9	Wellfield Management and Monitoring	5-7
5.1.10	Water Supply Reticulation	5-7
5.2	Energy	5-8
5.2.1	Existing Energy Production	5-8
5.2.2	Third Stage Energy Demand	5-9
5.2.3	Power Distribution	5-9
5.2.4	Nhulunbuy	5-9
5.3	Fuel	5-10
5.3.1	Fuel Oil	5-10
5.3.2	Natural Gas	5-10
5.3.3	Other Fuels	5-10
5.4	Sewerage	5-10
5.4.1	Refinery	5-10
5.4.2	Nhulunbuy	5-11
5.5	Transport	5-11
5.5.1	Air	5-11
5.5.2	Roads	5-13
5.5.3	Shipping	5-15
6	Alternatives-----	6-1
6.1	Alternatives	6-1
6.2	Business Alternatives	6-1
6.2.1	Greenfield project	6-1
6.2.2	Alternate Brownfield expansion	6-1
6.2.3	Buy alumina from third parties	6-1

6.3	Site Alternatives	6-1
6.4	Process Alternatives	6-2
6.5	Raw Materials Alternatives	6-2
6.5.1	Bauxite	6-2
6.5.2	Fuel	6-2
6.5.3	Fresh Water	6-3
6.5.4	Seawater	6-3
6.5.5	Caustic Soda	6-3
6.6	Environmental Management Technology Alternatives	6-4
6.6.1	Treatment of Residue Waste Water	6-4
6.6.2	Treatment of Residue	6-4
6.6.3	Residue Disposal Areas	6-4
6.6.4	Evaporation Cooling	6-4
6.6.5	Air Pollution Control Technologies	6-4
6.7	Workforce Accommodation Alternatives	6-5
6.8	Construction Alternatives	6-5
6.9	“No Go” Alternative	6-5
7	Waste Management -----	7-1
7.1	Introduction	7-1
7.2	Waste Management Standards	7-2
7.3	Current Waste Management Practices	7-2
7.3.1	Solid Wastes	7-2
7.3.2	Liquid Wastes	7-5
7.4	Effects of Proposed Expansion on Waste Impacts	7-5
7.4.1	Operational Wastes from Expanded Refinery	7-5
7.4.2	Construction Waste	7-6
7.5	Waste Management Strategy	7-8
8	Air Quality -----	8-1
8.1	Introduction	8-1
8.2	Ambient Air Quality Guidelines	8-1
8.2.1	Air NEPM	8-1
8.2.2	NPI/Draft NEPMs	8-2
8.3	Regional Meteorology	8-2
8.3.1	Monitoring Stations	8-2
8.3.2	Climatic Conditions	8-3
8.3.3	Mixing Height	8-4
8.3.4	Validation of Meteorological Model	8-5
8.4	Air Quality Monitoring Program	8-5
8.5	Emissions	8-6
8.5.1	Existing Emission Sources	8-6
8.5.2	Emission Sources from the Expanded Refinery	8-7
8.5.3	Emission Control	8-8
8.5.4	Emission Rates	8-9
8.6	Air Dispersion Modelling	8-10
8.6.1	Model Descriptions	8-10
8.6.2	Model Validation	8-10
8.7	Results of Air Dispersion Modelling	8-11
8.8	Health Risk Assessment	8-13
8.9	Odour	8-14
8.10	Ozone	8-15

8.11	Air Quality Management	8-16
9	Greenhouse Gas -----	9-1
9.1	Greenhouse Gas	9-1
9.2	Alcan's Greenhouse Strategies	9-1
9.2.1	Targeting Climate Change	9-1
9.2.2	Life Cycle Analysis	9-2
9.2.3	Greenhouse Challenge	9-2
9.3	Government Strategies	9-3
9.3.1	Northern Territory Greenhouse Strategies	9-3
9.3.2	Australian Greenhouse Strategies	9-3
9.3.3	International Arrangements	9-4
9.4	Greenhouse Gas Effects of Refinery Expansion	9-4
9.5	Management of Greenhouse Gas Emissions	9-7
9.5.1	Ongoing Involvement in Alcan's TARGET Program	9-8
9.5.2	Contribution to Bushfire Management	9-8
9.5.3	Tree Planting	9-8
9.5.4	Energy Efficiency Program at Nhulunbuy	9-8
9.5.5	Energy Management Program at the Refinery	9-8
9.5.6	Bus Service	9-9
10	Noise -----	10-1
10.1	Introduction	10-1
10.2	Noise Standards	10-1
10.2.1	Operational Noise	10-1
10.2.2	Construction Noise	10-2
10.2.3	Road Traffic	10-3
10.2.4	Sleep Disturbance	10-3
10.3	Existing Noise Levels	10-4
10.3.1	Refinery Noise Sources	10-4
10.3.2	Unattended Noise Monitoring	10-5
10.3.3	Attended Noise Monitoring	10-5
10.4	Noise Modelling	10-6
10.4.1	Noise Model	10-6
10.4.2	New Noise Sources	10-6
10.4.3	Meteorological Conditions	10-7
10.4.4	Model Accuracy	10-7
10.5	Operational Phase Noise Effects	10-8
10.5.1	Refinery Noise	10-8
10.5.2	Conveyor Alarms	10-9
10.5.3	Road Traffic	10-9
10.6	Construction Noise Effects	10-10
10.6.1	Refinery Construction	10-10
10.6.2	Construction Traffic	10-11
10.7	Noise Management	10-11
11	Surface Water -----	11-1
11.1	Climate and General Hydrology	11-1
11.2	Existing Catchments, Surface Water Systems and Hydrology	11-2
11.2.1	Refinery Catchments	11-2
11.2.2	Residue Disposal Area and Surrounding Catchments	11-3

11.3	Current Surface Water Management	11-5
11.3.1	Refinery	11-5
11.3.2	Residue Disposal Area	11-9
11.4	Water Quality Monitoring Program	11-13
11.5	Current Surface Water Quality	11-14
11.5.1	Refinery Discharges	11-14
11.5.2	Discharges from Catchments Surrounding the RDA	11-15
11.6	Construction Impacts and Mitigation	11-16
11.6.1	Construction Impacts	11-16
11.6.2	Construction Mitigation Strategies	11-16
11.7	Expanded Refinery Surface Water Management	11-17
11.7.1	Overview	11-17
11.7.2	Seawater Cooling Discharge	11-18
11.7.3	Bunding and Containment	11-18
11.7.4	Caustic To Ground	11-19
11.7.5	Stormwater Management	11-19
11.8	Residue Disposal Area Surface Water Management	11-20
11.8.1	Overview	11-20
11.8.2	Waste Water Inventory Reduction Project	11-20
11.8.3	Liquor Purification Project	11-20
11.9	Water Quality Impacts and Mitigation	11-20
11.9.1	Overview	11-20
11.9.2	Refinery Discharge Quality	11-21
11.9.3	Effect on Receiving Environment	11-21
11.9.4	Water Quality Monitoring and Impact Mitigation	11-21
11.10	Surface Water Management Plan	11-22
12	Groundwater-----	12-1
12.1	Refinery 12-1	
12.1.1	Background	12-1
12.1.2	Monitoring Program	12-1
12.1.3	Standards	12-1
12.1.4	Existing Environment	12-2
12.1.5	Expanded Refinery Groundwater Impacts	12-4
12.1.6	Refinery Groundwater Management	12-5
12.2	Residue Disposal Area	12-5
12.2.1	Background	12-5
12.2.2	Monitoring Program	12-6
12.2.3	Standards	12-6
12.2.4	Existing Environment	12-6
12.2.5	RDA Groundwater Impacts from Expansion	12-8
12.2.6	RDA Groundwater Management	12-8
13	Marine Water and Sediment Quality-----	13-9
13.1	Background	13-9
13.2	Monitoring/Investigation Program	13-9
13.2.1	Routine Monitoring Program	13-9
13.2.2	Additional Monitoring Programs	13-2
13.3	Standards	13-3
13.3.1	Water Quality	13-3
13.3.2	Sediments	13-3
13.4	Current Marine Water Quality	13-4

13.4.1	Region	13-4
13.4.2	Gove Harbour Water Quality	13-4
13.4.3	Drimmie Arm Water Quality	13-5
13.4.4	Northern Beach Water Quality	13-5
13.5	Existing Marine Sediment Quality	13-5
13.5.1	Gove Harbour Sediment Quality	13-5
13.5.2	Drimmie Arm Sediment Quality	13-6
13.5.3	Northern Beach Sediment Quality	13-6
13.6	Refinery Expansion	13-6
13.6.1	Refinery Outfall	13-6
13.6.2	Shipping	13-7
13.7	Impact Assessment	13-7
13.7.1	Refinery Outfall Discharge	13-7
13.7.2	Changed Shipping Movements	13-9
13.8	Management	13-11
14	Marine Habitats	14-1
14.1	Background	14-1
14.2	Monitoring Programs	14-1
14.2.1	Refinery Outfall	14-1
14.2.2	Northern Beach	14-1
14.2.3	Drimmie Arm	14-1
14.2.4	Introduced Marine Species	14-1
14.2.5	Habitat surveys	14-2
14.3	Existing Environment	14-2
14.3.1	Regional Influences and Marine Biogeography	14-2
14.3.2	Southern Melville Bay	14-3
14.3.3	Fishing	14-10
14.4	Standards	14-11
14.5	Expanded Refinery Effects on Marine Habitats	14-12
14.5.1	Shipping	14-12
14.5.2	Benthic Macrofauna	14-13
14.5.3	Turtles	14-13
14.5.4	Migratory Species	14-13
14.5.5	Other Marine Habitats	14-14
14.6	Management	14-14
15	Terrestrial Biology	15-1
15.1	Introduction	15-1
15.2	Flora	15-1
15.2.1	Study Objectives	15-1
15.2.2	Data Sources	15-1
15.2.3	Sampling Conditions	15-2
15.2.4	Floristics, Structure and Community Assessment	15-2
15.2.5	Regional Context	15-4
15.2.6	Flora Survey	15-6
15.2.7	Project Effects	15-9
15.2.8	Management	15-11
15.3	Fauna	15-12
15.3.1	Study Objectives	15-12
15.3.2	Data Sources	15-12
15.3.3	Field Survey Methods	15-13

15.3.4	Site Selection and Habitats	15-13
15.3.5	Survey Results	15-13
15.3.6	Significant Fauna Species and Habitats	15-18
15.3.7	Impact Assessment	15-20
15.3.8	Management	15-22
15.4	Biting Insects	15-22
15.4.1	Previous Studies in the Nhulunbuy Area	15-22
15.4.2	Mosquito Breeding at Gove Peninsula	15-23
15.4.3	Mosquito Breeding Issues Relating to the Alcan Operations	15-24
15.4.4	Impact Assessment	15-24
15.4.5	Management Plan	15-27
16	Terrain and Soils -----	16-1
16.1	Terrain and Soils	16-1
16.2	Introduction	16-1
16.3	Geology 16-1	
16.4	Geomorphology, Land Systems and Land Units	16-2
16.4.1	Geomorphology	16-2
16.4.2	Land Systems	16-2
16.4.3	Land Units	16-3
16.5	Soils 16-3	
16.5.1	Objectives	16-3
16.5.2	Soil Survey	16-4
16.5.3	Soil Types in the Project Area	16-4
16.5.4	Soil Physical and Chemical Characterisation	16-5
16.5.5	Soil Erosion	16-6
16.6	Seismicity	16-9
16.6.1	Earthquake History	16-9
16.6.2	Ground Motion Estimates	16-9
16.6.3	Liquefaction	16-10
16.6.4	Design Standard	16-10
16.7	Soil Contamination	16-10
16.7.1	Introduction	16-10
16.7.2	Current Contaminated Areas	16-11
16.7.3	Site Contamination Standards	16-14
16.7.4	Proposed Expansion and Potential Contamination Impacts	16-15
16.7.5	Contamination Management	16-16
17	Aesthetics -----	17-1
17.1	Summary	17-1
17.2	Introduction	17-1
17.3	Visual Character of the Local Landscape	17-2
17.4	Landscape Units	17-2
17.5	Visibility of Existing Facilities	17-3
17.6	View Locations	17-4
17.6.1	Refinery	17-4
17.6.2	Residue Disposal Area	17-5
17.7	Refinery Expansion	17-6
17.8	Visual Impacts	17-7
17.8.1	Introduction	17-7
17.8.2	Refinery	17-7
17.8.3	Residue Disposal Area	17-9

17.9	Mitigation Measures	17-10
17.9.1	Refinery	17-10
17.9.2	Residue Disposal Area	17-10
18	Lighting-----	18-1
18.1	Background	18-1
18.2	Standards	18-1
18.2.1	Criteria for People	18-1
18.2.2	Criteria for Animals	18-1
18.3	Existing Refinery Lighting	18-2
18.4	Lighting Survey	18-2
18.4.1	Survey Methodology	18-2
18.4.2	Survey Results	18-2
18.5	Existing Light Effects	18-3
18.6	Expansion Impacts	18-3
18.7	Management Strategies	18-4
19	Rehabilitation and Decommissioning-----	19-1
19.1	Background	19-1
19.2	Rehabilitation and Closure Standards	19-1
19.3	Mine and Conveyor Corridor	19-2
19.3.1	Mine Rehabilitation	19-3
19.3.2	Mine Closure Criteria	19-4
19.3.3	Mine Closure Timing	19-5
19.4	Refinery and Port	19-5
19.4.1	Refinery Rehabilitation	19-6
19.4.2	Refinery Closure Criteria	19-7
19.4.3	Refinery Closure Timing	19-8
19.5	Residue Disposal Area	19-8
19.5.1	RDA Rehabilitation	19-9
19.5.2	RDA Closure Criteria	19-11
19.5.3	RDA Closure Timing	19-12
19.6	Town (Nhulunbuy)	19-12
19.7	Stakeholder Engagement	19-12
20	Cultural Heritage-----	20-1
20.1	Introduction	20-1
20.2	Historical Context	20-1
20.2.1	Yolngu History	20-1
20.3	Local Aboriginal Organisations	20-2
20.4	Aboriginal Art and Culture of East Arnhem Land	20-3
20.5	Cross Cultural Relationships	20-4
20.6	Registered Areas of Cultural and Natural Heritage Significance	20-5
20.6.1	Register of the National Estate	20-5
20.6.2	Archaeological and Heritage Place and Object Listings	20-6
20.6.3	Indigenous Sites of Significance	20-6
20.7	Native Title Act	20-9
20.8	Impact of Alcan Gove Expansion	20-9
20.8.1	Impact of Alcan Gove expansion	20-9
20.9	Management and Monitoring	20-9

21	Social and Community Effects -----	21-1
21.1	Introduction	21-1
21.2	Objectives	21-1
21.3	Land Use and Planning	21-2
21.3.1	Nhulunbuy	21-2
21.3.2	Land Use Controls	21-3
21.4	Existing Social and Community Profile	21-4
21.4.1	Demography - Nhulunbuy	21-4
21.4.2	Demography – Yirrkala	21-5
21.4.3	Residential Communities	21-6
21.4.4	Employment Profile	21-6
21.4.5	Education	21-11
21.4.6	Community Services and Facilities	21-11
21.4.7	Accommodation	21-12
21.4.8	Health Services	21-14
21.4.9	Harmony Djamamirri Mala Group	21-14
21.4.10	Recreation	21-14
21.4.11	Tourism	21-15
21.5	Social Impact of Existing Alcan Gove Presence	21-16
21.6	Attitudes to the Expansion Project	21-16
21.6.1	Perceived Advantages of the Project	21-17
21.6.2	Perceived Disadvantages of the Project	21-18
21.7	Social and Community Impacts	21-18
21.7.1	Workforce and Population	21-18
21.7.2	Housing and Accommodation	21-20
21.7.3	Community Facilities	21-21
21.8	Management Strategies	21-24
21.8.1	Introduction	21-24
21.8.2	Production of EIS Summary Document	21-25
21.8.3	Public Display and Consultation	21-25
21.8.4	Reference Groups	21-25
21.8.5	Construction Workforce Accommodation	21-25
21.8.6	Construction Workforce Code of Conduct	21-26
21.8.7	Off-Site Construction	21-26
21.8.8	Local Employment and Business Opportunities	21-26
21.8.9	Operational Workforce Accommodation	21-26
21.8.10	Amenity	21-26
22	Economics -----	22-1
22.1	Introduction	22-1
22.2	Economic Effects of Existing Operations	22-1
22.2.1	Northern Territory Effects	22-1
22.2.2	Local Effects	22-1
22.3	Economic Model	22-2
22.4	Economic Effects of Expanded Operations	22-2
22.4.1	Gross State Product	22-2
22.4.2	Wages and Employment	22-3
22.4.3	Government Revenue	22-4
22.4.4	Inter-sectoral Impacts	22-4
22.4.5	Balance of Trade	22-4
