

Full name: Jane Minor

Postcode: 4572

Submission contents:

I write as an Australian who is very concerned about the effects of climate change with which my children and grandchildren. The water, climate change and biodiversity impacts of this project have the potential to be significant and long-lived and should be subject to an Environmental Impact Statement, or at very least, a Supplementary Environment Report. The current project's submission fails to investigate or describe its major environmental impacts, and therefore fails the Australian people.
