Submission contents

Submission details:

We know that mega data centres use huge amounts of power and water to run. We need a thorough environmental impact study to be done before giving the go ahead for this data Centre or any other data Centre in the NT. I believe there has been little community consultation for the planning of this data Centre. I don't believe we need to fund a Centre like this especially when the environmental costs have not been considered. I recommend a full environmental impact study to be done prior to giving a go ahead to this data Centre.
