

DRAFT

Environmental Impact Statement

**Proposed Barramundi Fish Farm at Snake Bay
Melville Island, Northern Territory**

Prepared by
Enesar Consulting Pty Ltd

for
MARINE HARVEST

May 2006

(Report No. HO02072/02-Snake Bay EIS-version 1)

Contents

Contents	i
Foreword	1
1 Executive Summary	2
1.1 Introduction	2
1.2 Objectives of the EIS	2
1.3 Description of Proposal	2
1.4 Objectives of the Proposal	3
1.5 Location	3
1.6 Schedule	3
1.7 Layout and Infrastructure	4
1.8 Preferred Design Criteria for the Facility	4
1.9 Services and Support	6
1.9.1 Transport	6
1.9.2 Staffing	6
1.9.3 Power, Potable Water and Storage	6
1.10 Farm Operation	6
1.10.1 Emissions from the Operation	7
1.10.2 Chemicals	8
1.10.3 Ongoing Management, Maintenance and Administrative Requirements	8
1.11 Decommissioning and Rehabilitation	8
1.12 Legislative Requirements	8
1.13 Alternatives	9
1.14 Existing Environment	10
1.15 Physical and Biological Environment	11

i

1.16	Snake Bay Baseline Investigation	12
1.17	Port Hurd Pilot Farm Environmental Monitoring Results	13
1.18	Paspaley Pearls Oyster Studies	13
1.19	Risk Assessments	14
1.20	Environmental Management	19
1.21	Public Involvement and Consultation	23
2	Introduction	25
2.1	Background	25
2.2	Objectives and Scope of this Report	25
3	Description of the Proposal	26
3.1	Overview	26
3.2	Objectives, Benefits and Justification for the Project	26
	3.2.1 Background	26
	3.2.2 Objectives	28
	3.2.3 Benefits and Justification	28
3.3	Location of the Project	29
3.4	Project Schedule	31
3.5	Layout and Infrastructure	31
	3.5.1 Infrastructure	31
	3.5.1.1 Temporary Shore-Based Facility	31
	3.5.1.2 Long Term Barge-Based Facility	32
3.6	Preferred Design Criteria for the Facility	34
	3.6.1 Aims of the Design	34
	3.6.2 Site Limiting Factors	34
	3.6.3 Fish Net Design Criteria	35
	3.6.4 Barge Design Criteria	35
	3.6.5 Mooring Design Criteria	36
3.7	Services and Support	37
	3.7.1 Transport and Boat Movements	37
	3.7.2 Staffing and Servicing Requirements	38
	3.7.3 Barge Facilities	39
	3.7.4 Power, Potable Water Supply and Storage	39
3.8	Farm Operation	40
	3.8.1 Fish Cultivation	40
	3.8.2 Feeding	41
	3.8.3 Pens Inspections and Cleaning	42
	3.8.4 Grading and Counting	42
	3.8.5 Growth and Harvesting	43
	3.8.6 Steel Nets Construction	43
	3.8.7 Ensiler and Domestic Waste Disposal	43
	3.8.8 Emissions	44
	3.8.9 Chemicals	46
	3.8.9.1 Diesel and Fuels	46
	3.8.9.2 Solvents and Cleaners	46

	3.8.9.3	Chemicals, Fuels and Hazardous Materials Register	46
	3.8.10	Ongoing Management, Maintenance and Administrative Requirements	49
3.9		Decommissioning and Rehabilitation	49
3.10		Legislative Requirements	50
	3.10.1	Lease Requirements	50
	3.10.2	Native Title	50
	3.10.3	Compliance with Applicable Standards	51
4		Alternatives	52
	4.1	Not Proceeding with the Proposal	52
	4.2	Alternative Locations or Layout for the Whole Proposal	52
	4.3	Alternatives for Components of the Proposal	53
	4.3.1	Steel Nets	53
	4.3.2	Mooring Devices	53
	4.3.3	Operational Facilities	53
	4.4	Alternative Environmental Management Techniques	54
5		Existing Environment	55
	5.1	Regional Setting	55
	5.1.1	Climatic Zones	55
	5.1.2	Catchment Terrain Type	55
	5.1.3	Marine and Coastal Form and Habitat Structure	55
	5.1.4	Regional Population Centres	56
	5.1.5	Land and Water Use	56
	5.1.6	Land and Water Sensitivities	57
	5.1.7	Aboriginal Relationships to the Land and Cultural Values	58
	5.1.8	Feedback from Consultation with Local Tiwi People	59
	5.2	Physical and Biological Environment	59
	5.2.1	Existing Environment	59
	5.2.1.1	Climatic Factors	60
	5.2.1.2	Hydrology and Water Quality	61
	5.2.1.3	Bathymetry	61
	5.2.1.4	Existing Coastal and Marine Flora Species	61
	5.2.1.5	Existing Coastal and Marine Fauna Species	63
	5.2.2	Turtles and Dugongs	65
	5.2.3	Air Quality, Noise, Lighting and Visual Amenity	66
	5.3	Snake Bay Baseline Investigation	66
	5.3.1	Investigation	66
	5.3.2	Findings	67
	5.3.3	Conclusions	69
6		Potential Impacts from Fin-fish Aquaculture	70

6.1	Potential Impacts from Construction of the Farm	70
6.2	Potential Impacts of Escaped Fish	70
6.3	Potential Impacts from Fish Faeces and Nutrient Loads	70
6.4	Potential Impacts from Excess Feed and Feed Quality	71
6.5	Potential Impacts from Fish Feeding on Naturally-Occurring Food – Removal of Food from the Food Chain	71
6.6	Potential Impacts from Fish Aggregation	71
6.7	Potential Impacts from the Introduction of Diseases and Parasites and the Treatment of Fish using Introduced Chemicals	71
6.8	Potential Impacts from Waste Generation and Hazardous Materials	72
6.9	Potential Impacts from the Loss of Nets	73
6.10	Potential Impacts to Hydrodynamics	73
6.11	Potential Impacts on and from Predators	73
6.12	Potential Impacts on Flora	74
6.13	Potential Impacts on Bird, Reptile, Fish and Mammal Habitats	74
6.14	Potential Impacts on EPBC Act-listed Threatened and Migratory Species	74
6.15	Potential Impacts from Disturbance to Land Surface	75
6.16	Potential Impacts to Air Quality, Noise, Lighting and Visual Amenity	75
6.17	Potential Impacts on Social and Recreational Values	76
6.18	Potential Impacts on Local Infrastructure	77
6.19	Potential Impacts on Archaeological, Historical, Cultural and Aboriginal Sites	77
6.20	Potential Impacts on Marine Traffic	77
6.21	Potential Impacts on Staff of Pest Insects	77
6.22	Potential Impacts from the Farm on Personnel Emergencies	78
6.23	Potential Impacts on the Barramundi Market	78
6.24	Unknown, Unpredictable or Irreversible Impacts	78
7	Assessment of Impacts from the Port Hurd Pilot Farm	79
7.1	Port Hurd Environmental Monitoring Results	79
7.1.1	Port Hurd Investigations	79
7.1.2	Findings	80
7.1.2.1	Gullala Inlet Control Site	80
7.1.3	Implications and Recommendations	82
7.2	Comparison of Snake Bay versus Port Hurd Operations	82
7.3	Paspaley Pearls Oyster Studies	84
8	Discussion of Potential Impacts and Risk Assessment	85
8.1	Construction	87
8.1.1	Risk Assessment	87
8.2	Escaped Fish	87
8.2.1	Interbreeding	87
8.2.2	Disease and Parasite Transfer	88

8.2.3	Competition with Wild Populations and Increased Predation	88
8.2.4	Risk Assessment	88
8.3	Fish Faeces and Nutrient Loads	88
8.3.1	Risk Assessment	90
8.4	Excess Feed and Feed Quality	90
8.4.1	Risk Assessment	90
8.5	Removal of Fish from the Food Chain	91
8.6	Fish Aggregation	92
8.6.1	Risk Assessment	92
8.7	Introduction of Diseases and Parasites	92
8.7.1	Risk Assessment	93
8.8	Introduction of Chemicals from Treatment of Fish Parasites or Diseases	94
8.8.1	Risk Assessment	94
8.9	Waste Generation and Hazardous Materials	95
8.9.1	Risk Assessment	95
8.10	Loss of Nets	95
8.10.1	Risk Assessment	96
8.11	Hydrodynamics	96
8.11.1	Risk Assessment	96
8.12	Predators	97
8.12.1	Risk Assessment	97
8.13	Flora	97
8.13.1	Risk Assessment	97
8.14	Bird, Reptile, Fish and Mammal Habitats	98
8.14.1	Risk Assessment	99
8.15	EPBC Act-listed Threatened and Migratory Species	99
8.15.1	Risk Assessment	99
8.16	Land Surface	101
8.16.1	Risk Assessment	101
8.17	Air Quality, Noise, Lighting and Visual Amenity	101
8.17.1	Greenhouse Gases	101
8.17.2	Risk Assessment	102
8.18	Social and Recreational	102
8.18.1	Risk Assessment	103
8.19	Local Infrastructure	103
8.19.1	Risk Assessment	103
8.20	Archaeological, Historical, Cultural and Aboriginal Sites	104
8.20.1	Risk Assessment	104
8.21	Marine Traffic	104
8.21.1	Risk Assessment	105
8.22	Insects Pests	105
8.22.1	Risk Assessment	105

8.23	Personnel Emergencies	106
	8.23.1 Risk Assessment	106
8.24	Summary of Risk Assessments	106
9	Proposed Mitigation, Management and Monitoring	111
9.1	Maintenance and Monitoring Manual	111
9.2	Construction	111
9.3	Fish Escape	112
9.4	Disease and Parasite Transfer	112
9.5	Fish Faeces and Nutrient Loads	115
9.6	Excess Fish Feed and Feed Quality	115
9.7	Waste	117
	9.7.1 General Mitigation Measures for Waste	117
	9.7.2 Solid Putrescible Waste	118
	9.7.3 Sewage and Grey Water	118
	9.7.4 Solid Inert Waste	119
	9.7.5 Prescribed Waste	120
	9.7.6 Dead Farm Fish	120
9.8	Storage, Handling and Containment of Chemical and Hazardous Substances	121
9.9	Nets and Moorings	123
9.10	Hydrodynamics	124
9.11	Water and Sediment Quality	124
9.12	Management of Predators	126
9.13	Bird, Reptile, Fish and Mammal Habitats	127
9.14	Flora	128
9.15	EPBC Act-listed Threatened and Migratory Species	129
9.16	Land Surface	130
9.17	Air Quality, Noise, Lighting and Visual Amenity	131
9.18	Social and Recreational	132
9.19	Archaeological, Historical, Cultural and Aboriginal Sites	133
9.20	Marine Traffic	133
9.21	Mitigation of Nuisance and Health Risks from Pest Insects	134
9.22	Personnel Emergencies	134
9.23	Management and Monitoring of Quality of Farmed Barramundi	135
10	Environmental Management	136
10.1	Company Health Safety Environment and Quality Policy	136
	10.1.1 Objectives	137
10.2	Operational Standards	137
10.3	Standard Operational Procedures	138
10.4	Monitoring and Reporting Strategies	138
11	Public Involvement and Consultation	143
11.1	August to September 2005	143
11.2	November 2005	144

11.3	Future Consultation	144
12	Conclusions	145
13	References	147
	Limitations	148
