

Submission on the supplementary environmental report (SER)

Core Lithium Ltd – Finnis Lithium Project BP33 Underground Mine

This submission is made under regulation 123 of the Environment Protection Regulations 2020

Government authority: Department of Industry, Tourism and Trade

Summary: Mining Operations staff from DITT have reviewed the additional information provided in the supplementary environmental report (SER) for the Finnis Lithium Project BP33 Underground Mine. The SER addresses our concerns as raised under previous referrals and details the on-going required studies that will be completed prior to commencement of mining, specifically groundwater and waste rock characterisation studies. DITT has no further comments to make.
