Submission contents:

I would like to express my concern that the NT Govt is considering this proposal from the Carpentaria Pilot Project. The project has the potential to have a significant impact on the environment and Imperial should be required to prepare a full Environmental Impact Statement, or at the very least a Supplementary Environment Report. The material provided by the proponent is incomplete and inaccurate. It downplays the impacts of the project by omitting information and failing to investigate or describe its major environmental impacts. The water, climate change and biodiversity impacts of the project, in particular, have the potential to be significant and long-lived and should be subject to comprehensive assessment. Please consider the negative impacts that this project will force upon the people of the Northern Territory ... AND ...take the long view rather than the 'quick, easy money in' thinking when you make decisions about this
