As a resident not more than 5 minutes from this proposed site I can only reject this idea, this solar farm will only destroy native land and with darwins rural regions only expanding, this solar farm will become a bleak representation of darwin surrounds. Imagine in 10 15 20 years, homes surround at the heart.... solar panels, not parks, not native lands or communal gathering infrastructure. A bland, industrialized generator of electricity. Solar farms belong in the desert, they belong in places were humans do not live, they belong on top of car parks, on top of homes, not bulldozing hundreds of acres of native land, trees, habitat. This is an appalling proposal, it has no places in the rural community of Darwin surrounds.
