Submission contents:

Dear EPA, I live in Darley (Bacchus Marsh) in Victoria and have been environmentally involved for more than 50 years. I would like to make a desperate plea for you not to approve the Carpentaria Pilot project on the grounds of toxic waste, and use of much groundwater, and as well as other environmental destructions. Greed for profits is never satisfied, and I urge you to act FOR the ordinary Australian community who have no power to lobby governments, etc. etc. Best wishes from Mara Hayler
