Submission contents

Submission details:

Thank you for the opportunity to comment on this project. I would like to know that there will be an assessment on the environmental impact as it is well known that data centres use a lot of water and power. I would like to see any data centres built in the NT to be self-sufficient in this regard rather than endlessly drawing upon limited resources. I am against resources being provided for low or no cost. I would like all agreements to be transparent and open to further comment by Territorians before any decisions are made and for regulations governing the creation and running of data centres be put in place. I only learned about the proposed establishment of hyper scale data centres in the NT very recently and encourage the NT Government to hold public information sessions in the major centres where we can learn about the proposals and communicate any concerns we may have
