If yes, please enter the name of the organisation:

Submission contents

Submission details:

The environment and water are so much more important than data centers. Why doesn't the NT Government not care about the consequences of allowing data centers ? Why would you think spending our tax money on destroying the environment is something that would ever benefit the NT ? You are stealing the future of the NT. I oppose any data centers in the NT, NTG should be protecting our water and our environment ! It is very clear you are all completely out of your depth in governing for now and the future.
