

TABLE OF CONTENTS

CHAPTER 1 - INTRODUCTION

1.1 The project — background & context.....	2
1.2 Land and water resources.....	4
1.2.1 Existing environment	4
1.3 Project description.....	9
1.3.1 Project proponent	10
1.3.2 Project context	11
1.3.3 Project land tenure and environmental aspects.....	12
1.3.4 Project objectives	14
1.3.5 Project schedule and current status	16
1.4 Environmental impact assessment process.....	16
1.4.1 Consultation process	19
1.4.2 Historical environmental compliance	22
1.5 Relevant legislation.....	22
1.5.1 Legislation	22
1.5.2 ABM policies – community and environment, including sustainable development .	23
1.6 Draft EIS structure and objectives	25
1.6.1 Environmental studies	25
1.7 Draft study team	31
1.8 Draft EIS structure.....	38
1.9 Conclusion.....	41

CHAPTER 2 – REGULATORY ENVIRONMENT

2.1 The project - background and context.....	43
2.2 Previous impact assessments	44
2.3 Commonwealth legislation and policy requirements.....	44
2.3.1 Environment Protection and Biodiversity Conservation Act 1999	44
2.3.2 Native Title Act 1993	45

2.3.3 Aboriginal Land Rights (Northern Territory) Act 1976.....	46
2.3.4 Other Acts that may apply	46
2.3.5 Leading practice	47
2.4 Northern Territory legislation and policy requirements	48
2.4.1 Environmental Assessment Act 1982.....	48
2.4.2 Mining Management Act 2001	48
2.4.3 Mineral Titles Act 2010	49
2.4.4 Territory Parks and Wildlife Conservation Act 2000.....	50
2.4.5 Water Act 2004	50
2.4.6 Heritage Act 2011.....	51
2.4.7 Northern Territory Aboriginal Sacred Sites Act 1989	52
2.4.8 Planning Act 1999	52
2.4.9 Other relevant legislation	53
2.5 Local government requirements	53
2.5.1 Central Desert Shire	53
2.6 Standards and codes of practice.....	53
2.7 Approval timeframes	55

CHAPTER 3 – PROJECT DESCRIPTION

3.1 Project background & history	58
3.1.2 Project area geology.....	58
3.1.2.1 Regional geology	58
3.1.2.2 Resource drilling and surface work	59
3.1.2.3 Resource estimation.....	61
3.2 Proposed project	61
3.2.1 Staged approach to development designed to minimise risk and maximise return	62
3.2.2 Staged approach versus feasibility studies	62
3.2.2.1 Stage one – trial mining and processing	64
3.2.2.2 Stage two – open pit mining to approximately 35 metres depth.....	64

3.2.2.3	Stage three – open pit mining.....	65
3.2.2.4	Beyond stage three	65
3.3.	Proposed mining project	66
3.4	Mining	74
3.4.1	Overview	74
3.4.2	Mining techniques – open pit excavation and mine sequencing	74
3.4.3	Open pit stability	77
3.4.4	Slope design	77
3.4.5	Haul ramp design	78
3.4.6	Mining activities	78
3.4.7	Mining offices, workshops and associated infrastructure	79
3.4.8	Drilling and blasting.....	79
3.4.9	Mining and ancillary fleet.....	80
3.4.10	Mine water management	81
3.4.11	ROM pad / ore haulage	85
3.4.12	Handling and stockpiling of waste rock and waste rock design	85
3.4.12.1	Physical characterisation of waste	88
3.4.12.2	Chemical characterisation of waste	88
3.5	Processing	89
3.5.1	Processing facilities	89
3.5.2	Concentrate upgrade	92
3.5.3	Tailings.....	92
3.5.3.1	Characterisation of tailings.....	94
3.5.4	Tailings dam.....	94
3.5.4.1	Tailings dam design	95
3.5.5	Clay source for tailings dam construction.....	96
3.5.6	Process water	96
3.5.7	Project process inputs and outputs	97
3.6	Concentrate storage, pouring / shipping	97
3.7	Infrastructure	97
3.7.1	Potable water supply.....	97
3.7.2	Power	98

3.7.2.1 Power generation and power requirements.....	98
3.7.2.2 Thermal solar energy.....	99
3.7.3 Fuel (diesel) supply.....	100
3.7.4 Fuel storage.....	100
3.7.5 Explosives storage.....	101
3.7.6 Sewage.....	101
3.7.7 Accommodation village.....	101
3.7.7.1 Telecommunications.....	103
3.7.8 Airport.....	103
3.8 Construction activities.....	104
3.8.1. Pre-construction phase.....	105
3.8.2 On-site civil construction.....	105
3.8.3 Construction workforce.....	105
3.9 Operational activities.....	106
3.9.1 Operational workforce.....	106
3.9.2 Emissions.....	107
3.10 Rehabilitation and closure.....	108

CHAPTER 4 – PROJECT RATIONALE AND ALTERNATIVES

4.1 Introduction.....	110
4.2 Project rationale and benefits.....	110
4.2.1 Market opportunities.....	110
4.2.1.1 Global and national gold production.....	111
4.2.2 Consequences of not proceeding with the proposed project.....	112
4.2.3 Viability of the project.....	113
4.3 Environmental objectives.....	113
4.3.1 Corporate environmental statement.....	113
4.3.2 Sustainable development policy.....	114
4.4 Project alternatives.....	115
4.4.1 Introduction.....	115
4.4.2 Alternative location.....	116

4.4.3 Internal project alternatives.....	119
--	-----

CHAPTER 5 – RISK ASSESSMENT

5.1 Environmental management structure	129
5.1.1 Environmental policy.....	130
5.1.2 Risk management strategy.....	131
5.1.3 Reporting.....	132
5.1.4 Audits.....	132
5.1.5 Environmental incident reporting and non-compliance	133
5.1.5.1 Environmental training and education	133
5.2 Risk assessment objectives	134
5.2.1 Hazard and risk management definitions	135
5.2.2 Potential hazard categories.....	136
5.2.2.1 Surface and ground water	136
5.2.2.3 Biodiversity (including threatened species).....	137
5.2.2.4 Community / employees - cultural & health safety.....	137
5.2.2.5 Air quality and noise / vibration.....	138
5.2.2.6 Cyanide.....	138
5.2.2.7 Rehabilitation	138
5.3 Risk assessment, management and controls.....	138
5.3.1 Risk management process.....	138
5.3.2 Risk methodology	139
5.3.3 Existing operations	143
5.3.4 The project	143
5.4 Risk management plans	162
5.5 Incident management.....	162
5.5.1 Incident notification	163
5.5.1.1 Dangerous incidents.....	163
5.5.1.2 Serious injury or illness	164
5.5.2 Environmental incidents.....	164

5.6 Emergency management	164
--------------------------------	-----

CHAPTER 6 - BIODIVERSITY

6.1 Introduction	169
6.2 Environmental objectives	169
6.3 Definitions	170
6.3.1 Biodiversity	170
6.3.2 Significant species.....	171
6.3.3 Sensitive habitat	171
6.3.4 Cultural values for biodiversity.....	172
6.4 Regional environmental context	172
6.4.1 Bioregion description	172
6.4.2 Site of Conservation Significance	173
6.4.3 Indigenous protected areas.....	173
6.4.4 Regional flora and fauna data	174
6.4.4.1 NT Atlas records	174
6.4.4.2 Threatened species	175
6.4.4.3 Water birds and migratory species	177
6.4.4.4 Weeds.....	177
6.4.4.5 Feral Animals.....	177
6.4.5 Fire regime.....	178
6.5 Vegetation survey – Twin Bonanza	178
6.5.1 Flora survey methods	178
6.5.1.1 Vegetation mapping.....	179
6.5.1.2 Sensitive habitat surveys.....	179
6.5.1.3 Weed survey.....	179
6.5.2 Vegetation communities	180
6.5.3 Sensitive or notable vegetation communities.....	180
6.5.4 Significant flora species	184
6.5.5 Weeds.....	184
6.6 Fauna survey – Twin Bonanza	185

6.6.1	Fauna survey methods	185
6.6.1.1	Survey effort.....	185
6.6.1.2	Survey Protocol	186
6.6.1.3	Targeted surveys	188
6.6.2	Fauna survey Summary	188
6.6.2.1	Amphibians.....	188
6.6.2.2	Reptiles.....	188
6.6.2.3	Birds.....	189
6.6.2.4	Mammals.....	190
6.6.3	Significant fauna species	191
6.6.4	Feral animals.....	191
6.7	Risk assessment – biodiversity	193
6.7.1	Vegetation communities	193
6.7.1.1	Vegetation clearing activities	194
6.7.1.2	Introduction or spread of weed species	195
6.7.2	Sensitive habitats.....	196
6.7.2.1	Vegetation clearing	197
6.7.2.2	Groundwater extraction.....	198
6.7.2.3	Habitat modifications.....	199
6.7.2.4	Poor management of supply water	200
6.7.3	Threatened fauna species	200
6.7.3.1	Vegetation clearing activities	202
6.7.3.2	Introduction or spread of weed species	203
6.7.3.3	Introduction or spread of pest species	204
6.7.3.4	Vehicle movements.....	206
6.7.3.5	Lights, noise and vibrations.....	207
6.7.4	Migratory species and water birds.....	208
6.7.4.1	Poor management of process water in tailings facility.....	209

CHAPTER 7 – WATER MANAGEMENT

7.1	Risks to groundwater and surface water quality	212
7.2	Existing environment	212
7.2.1	Climate	213
7.2.2	Environmental values	213
7.2.3	Surface water.....	214
7.2.4	Groundwater	218
7.3	Planned infrastructure	223
7.3.1	Surface water	223
7.3.2	Groundwater	228
7.4	Assessment of risks	230
7.4.1	Surface water	230
7.4.2	Groundwater	234
7.5	Mitigation.....	235
7.5.1	Surface water	235
7.5.2	Groundwater	236
7.6	Monitoring	238
7.6.1	Surface water.....	239
7.6.2	Groundwater	240
7.7	Conceptual water account.....	244

CHAPTER 8 – AIR QUALITY AND GREENHOUSE GAS EMISSIONS

8.1	Introduction	247
8.1.1.	Assessment of potential air quality impacts	247
8.2	Air quality guidelines	248
8.2.1.	Waste Management and Pollution Control Act 2009 (NT).	248
8.2.2.	National Environment Protection Council	249
8.2.3.	Other applicable standards and goals.....	250
8.3	Greenhouse gas policies	251
8.4	Existing environment	251
8.4.1	Climate	251
8.4.2	Sensitive receptors.....	251

8.4.2.1	Risks to biodiversity and native fauna	253
8.4.3	Existing sources of emissions	253
8.4.3.1	Greenhouse gases.....	253
8.4.3.2	Odours.....	254
8.4.4	Existing monitoring of emissions	254
8.4.4.1	Depositional dust monitoring	254
8.4.4.2	Other existing air quality parameters.....	254
8.5	Air quality assessment	254
8.5.1	Dust emissions.....	254
8.5.2	Greenhouse gases point sources inventory.....	255
8.5.2.1	Assessment methodology.....	256
8.5.2.2	Results.....	259
8.6	Management and mitigation	261
8.6.1	Operational management and mitigation	261
8.6.1.1	General operations	261
8.6.1.2	Dust generation	262
8.6.1.3	Greenhouse gases.....	263
8.7	Monitoring and compliance.....	264
8.7.1	Dust monitoring	264
8.7.2	Community / social monitoring	266

CHAPTER 9 – WASTE MANAGEMENT

9.1	Introduction	268
9.2	Waste management legislation and requirements	268
9.3	Waste management principles	268
9.4	Waste management strategies.....	269
9.4.1	Waste monitoring	269
9.4.2	Waste reporting.....	270
9.4.3	Existing waste facilities	270
9.4.3.1	Landfill.....	273
9.4.3.2	Reduction, recycling and reuse.....	273
9.4.3.3	Contaminated waste – storage/ handling/containment and emergency management of hazardous materials.....	274
9.4.3.4	Putrescible and solid waste	274

9.4.3.5 Sewage treatment & waste water	275
9.4.3.6 Water treatment – Reverse osmosis plant.....	275
9.5 Potential impacts and mitigation measures	276
9.5.1 Operational wastes	277
9.5.2 Mine closure wastes	284

CHAPTER 10 – TAILINGS AND WASTE ROCK MANAGEMENT

10.1 Introduction	286
10.2 Waste management legislation and regulations	286
10.3 Waste management principles	287
10.4 Waste management strategies.....	287
10.4.1 Existing facilities	290
10.4.1.1 Existing tailings dam.....	292
10.4.1.2 Existing waste rock dump	292
10.5 Proposed mining wastes	293
10.5.1 Operational wastes.....	293
10.6 Tailings characterisation and management.....	297
10.6.1 Tailings characterisation.....	297
10.6.2 Tailings processing.....	300
10.6.3 Conceptual tailings and concentrate residual dam risk assessment.....	303
10.6.4 Conceptual tailings dam design.....	305
10.6.5 Conceptual CRD design.....	309
10.6.6 Tailing deposition and water management	313
10.6.7 Conceptual tailings dam seepage analysis	313
10.6.8 Seepage management measures	314
10.6.9 Tailings dam and CRD monitoring	314
10.6.10 Tailings dam and CRD rehabilitation	315
10.6.11 Future work	315
10.7 Waste rock characterisation and management	316
10.7.1 Waste rock locational considerations	316
10.7.2 Waste rock characterisation chemical	316
10.7.3 Waste rock characterisation physical.....	319
10.7.4 Waste rock dump risk assessment	322
10.7.5 Waste rock dump design	323
10.7.6 Waste rock dump surface water management.....	328

10.7.7 Waste rock dump monitoring	328
10.7.8 Waste rock dump rehabilitation.....	329
10.8 Topsoil and rehabilitation stockpiles	330
10.9 Pit areas.....	330

CHAPTER 11 – CLOSURE AND REHABILITATION

11.1 Introduction	332
11.2 Environmental values	332
11.3 Rehabilitation objectives	332
11.4 Rehabilitation Strategy	333
11.5 Rehabilitation and decommissioning success factors	333
11.6 Rehabilitation guidelines and closure objectives	334
11.7 Land disturbance areas	335
11.8 Mine rehabilitation processes	335
11.8.1 Design criteria	335
11.8.2 Rehabilitation.....	336
11.8.3 Shaping and contouring.....	337
11.8.4 Topsoil management	337
11.8.5 Seeding and revegetation	338
11.8.6 Sediment control and erosion	338
11.8.7 Flood mitigation.....	338
11.8.8 Geotechnical stability	338
11.8.9 Fire management.....	339
11.8.10 Weed management	339
11.8.11 Recognition of uncertainty	339
11.9 Care and maintenance	340
11.10 Decommissioning – mine closure	341
11.11 Mine closure requirements	343
11.11.1 Decommissioning personnel.....	343
11.11.2 Monitoring and caretaking	343
11.11.3 Final site relinquishment and infrastructure handover.....	343

CHAPTER 12 – ROAD TRANSPORT AND TRAFFIC MANAGEMENT

12.1 Introduction	345
12.2 Existing road infrastructure	347
12.2.1 Tanami Road	347
12.2.2 Existing access road to site	349
12.2.3 Internal road networks	351
12.3 Airstrip.....	351
12.3.1 Airstrip upgrade	352
12.4 Proposal for other access facilities	354
12.5 Proposal for new road infrastructure	354
12.5.1 Construction of roads	354
12.5.2 Plant and machinery	355
12.5.3 Vegetation clearing methods.....	355
12.5.4 Construction crew accommodation	356
12.5.5 Surface water and sources of water	356
12.5.6 Construction materials and provisions for transport infrastructure maintenance	358
12.5.7 Methods including creek crossing techniques where relevant.....	358
12.5.8 Timeframe for transport infrastructure construction	359
12.5.9 Dust and noise	359
12.6 Road use and potential impacts	360
12.6.1 External routes.....	360
12.6.2 On-site traffic	362
12.6.3 Additional transport infrastructure and design.....	362
12.6.4 Daily traffic generation and hours of operation	364

CHAPTER 13 – SOCIAL, ECONOMIC, CULTURAL AND HERITAGE RISKS

13.1 Introduction	368
13.2 Socio-economic risks.....	368
13.2.1 Staged approach to development designed to minimise risk and maximise return	368
13.2.2 Staged approach versus feasibility studies	368

13.3	The project’s contribution to the Northern Territory and Australian economy	370
13.3.1	Estimated total project revenue for the duration of the project and contribution to gross domestic product (GDP) and Gross State Product.....	370
13.3.2	Estimated workforce	371
13.3.3	Indirect employment and opportunities to regional centres	372
13.3.4	Planned Indigenous employment and training opportunities.....	372
13.3.5	Expected level of overseas recruitment.....	373
13.3.6	Availability of goods and services	373
13.3.7	Residual infrastructure.....	373
13.4	Economic and social impact assessment	373
13.4.1	Discussion on the project’s social value.....	373
13.4.1.1	Regional community structures and vitality.....	374
13.4.2	Economic and social impact assessment on Indigenous Australians/Traditional Owners of the project	375
13.4.2.1	Voluntary and discretionary contributions by ABM to individual programs for support of Indigenous Australians	378
13.4.2.2	Voluntary construction or infrastructure assistance if requested	378
13.4.2.3	Disturbance of habitat in traditional hunting and bush food gathering areas	379
13.4.2.4	Disturbance of sacred sites	379
13.4.2.5	Indigenous employment and training opportunities	379
13.4.2.6	Ad hoc support by virtue of our presence.....	380
13.4.3	Economic and social impact assessment on non-specified peoples* principally Northern Territorians and Australian population as a whole.....	380
13.4.3.1	Government rents, levies and royalties	382
13.4.3.2	Company and income taxes	382
13.4.3.3	Indirect employment opportunities / supporting regional businesses....	384
13.4.3.4	Work-place safety and occupational risks.....	386
13.4.3.5	Increased use of public amenities and infrastructure.....	386
13.4.3.6	Disturbance of areas and overall environmental impact.....	388
13.4.3.7	Increased exploration funded by revenues from mining.....	388
13.4.3.8	Perception of the Northern Territory resources industry being “open for business”	388

13.5 Social Impact Management Plan – mitigation and monitoring.....	389
13.5.1 SIMP methodology - stakeholder engagement strategies	390
13.5.2 SIMP management of economic and social impact assessment.....	390
13.5.2.1 Indigenous Australians / Traditional Owners.	390
13.5.2.2 Non-Indigenous Australians, the people, businesses and Northern Territory as a whole Impact on businesses with priority to business in the Northern Territory	393
13.5.3 SIMP monitoring of socio-economic and cultural impacts.....	394
13.5.3.1 Monitoring of socio-economic impacts.....	394
13.5.3.2 Outcome and threshold criteria / early warning of adverse social impacts or initiatives not working	394
13.5.3.3 Reporting	396
13.6 Risks to historic and cultural heritage	396
13.6.1 Sites of historic or cultural heritage.....	396
13.6.2 Clearances by the CLC and Traditional Owners	396
13.6.3 Archaeological surveys by ABM	397
13.6.3.1 Surveys of areas for potential non-Aboriginal cultural significance	398
13.6.4 Protection of Indigenous cultural heritage and associated AAPA clearances.	399
13.6.5 Assessment of risk to areas of cultural / heritage significance	399
13.6.5.1 Identify place and associations.....	400
13.6.5.2 Gather and record information about the place sufficient to understand significance	400
13.6.5.3 Assess significance & statement of significance	401
13.6.5.4 Identify obligations arising from significance.....	401
13.6.5.5 Gather information about other factors affecting the future of the place	401
13.6.5.6 Prepare a statement of policy	401
13.6.5.7 Manage place in accordance with policy	401
13.6.5.8 Monitor and review	401
13.7 Cultural Heritage Risk Management Plan.....	402
13.7.1 Company policy on cultural heritage.....	402
13.7.2 Responsibilities	403
13.7.3 Methodology.....	403
13.7.3.1 Assessment of risk to areas of cultural / heritage significance	403

13.7.4	Management and mitigation	403
13.7.4.1	Maintain a register of sites	403
13.7.4.2	Avoidance of known sites and ongoing protection work.....	403
13.7.4.3	Conduct regular surveys and reporting.....	404
13.7.5	Monitoring and review.....	405
13.7.5.1	Reporting.....	405

CHAPTER 14 – ENVIRONMENTAL MANAGEMENT PLAN

14.1	Introduction	408
14.1.1	Purpose and Scope	408
14.1.2	Environmental management.....	408
14.2	Existing environmental management system	410
14.2.1	Review / audits	410
14.2.2	Legislative requirements	411
14.2.3	Responsibilities	412
14.2.4	Objectives, targets and performance indicators.....	415
14.2.5	Competence, training and awareness.....	416
14.2.6	Communication	417
14.2.6.1	Internal communications.....	418
14.2.6.2	External information and communication.....	419
14.2.7	EMP elements, aspect and impacts.....	420
14.2.8	Structure of EMP	421
14.3	Construction Environmental Management Plan	422
14.3.1	Flora and fauna - biodiversity.....	426
14.3.2	Surface water.....	426
14.3.3	Groundwater	426
14.3.4	Fire management.....	426
14.3.5	Air quality and greenhouse gases.....	426
14.3.6	Noise and vibration.....	426
14.3.7	Waste management	428
14.3.7.1	Mineralised.....	428
14.3.7.2	Non-mineralised.....	428

14.3.8	Rehabilitation	430
14.3.9	Community	431
14.3.9.1	Cultural	431
14.3.9.2	Social	431
14.3.10	Biting insects	431
14.3.11	Chemicals and dangerous goods	432
14.3.12	Health and safety	433
14.3.13	Incidents and complaints management	434
14.4	Operational Environmental Management Plan	435
14.4.1	Flora and fauna - biodiversity	435
14.4.2	Surface water	441
14.4.3	Groundwater	445
14.4.4	Fire Management	448
14.4.5	Air quality and greenhouse gases	451
14.4.6	Noise and vibration	454
14.4.7	Waste	456
14.4.7.1	Mineralised	456
14.4.7.2	Non-Mineralised	459
14.4.8	Rehabilitation	459
14.4.9	Community	459
14.4.9.1	Cultural & Heritage	459
14.4.9.2	Social	462
14.4.10	Biting insects	465
14.4.11	Chemicals and dangerous goods	465
14.4.12	Health and safety	468
14.4.13	Incidents and complaints management	468
14.5	Mine Closure Environmental Management Plan	470
14.6	Environmental performance reporting	473

CHAPTER 15 – ENVIRONMENTAL OFFSETS

15.1 Introduction	475
15.2 Legislative requirements.....	477
15.2.1 Northern Territory Government environmental offset policy.....	477
15.2.2 Commonwealth environment offset policy	477
15.3 Offsets planning	478
15.3.1 Consultation with relevant stakeholders	478
15.3.2 Proposed offset selection criteria	479
15.3.2.1 Northern Territory Government offset criteria	479
15.3.2.2 Commonwealth Government offset criteria.....	479
15.4 Proposed offset options.....	481
15.4.1 Management and mitigation of effects on greater bilby habitat	481
15.4.2 Offsets best suited for successful implementation	482
15.4.3 Offsets descriptions	483
15.4.3.1 Publication of research data on the greater bilby.....	483
15.4.3.2 Feral animal control	484
15.4.3.3 Weed infestation control program	484
15.4.3.4 Social and economic contributions to the Indigenous and non-indigenous communities	485
15.4.3.5 Voluntary and discretionary contributions by ABM to individual programs for support of Indigenous Australians	486
15.4.3.6 Voluntary construction or infrastructure assistance if requested.....	487
15.4.3.7 Indigenous employment and training opportunities.....	487
15.4.3.8 Regional biodiversity monitoring in the Tanami Desert	487
15.4.3.9 Solar power generation.....	488
15.5 Risks associated with the offsets and management actions.	488
15.6 Residual impacts	488
15.7 Implementation process	491
15.7.1 Timeframe	492

CHAPTER 16 – ADDITIONAL ENVIRONMENTAL IMPACTS

16.1 Introduction	495
16.2 Bushfire and fire management	495
16.2.1 Relevant legislation and codes of practice.....	496
16.2.1.1 Standards and guidance material.....	496
16.2.1.2 Consultation	497
16.2.2 Management	498
16.2.2.1 Bushfire and wildfire threat	499
16.2.3 Mitigation strategies and hazard management.....	500
16.2.3.1 Monitoring wildfires	500
16.2.3.2 Fire breaks	500
16.2.3.3 Hot work permit – NT Worksafe	501
16.2.3.4 Incineration of wastes	502
16.2.3.5 Fire fighting equipment.....	502
16.2.3.6 Vehicle inspections.....	502
16.3 Noise and vibration.....	503
16.3.1 Consultation	503
16.3.2 Risk assessment.....	504
16.3.3 Risk management – operational control.....	504
16.3.3.1 Construction phase.....	505
16.3.3.2 General operations.....	505
16.3.3.3 Shot firing and blasting.....	506
16.3.4 Risk management – biodiversity and native fauna	506
16.3.5 Monitoring.....	507
16.4 Biting Insect Management.....	508
16.4.1 Environment and species	508
16.4.2 Management measures	512
16.4.2.1 Prevention	512
16.4.3 Monitoring.....	513
16.4.4 Control.....	513
16.4.4.1 Habitat modification.....	513

16.4.4.2 Chemical controls	513
16.5 Vegetation clearing and ground disturbance	514
16.5.1 Vegetation clearing	515
16.5.2 Topsoil clearing	515
