Submission contents:

I am concerned regarding Singleton environmental impact for the following reasons.

Fortune's own report models groundwater dropping up to 50 meters in some areas of the property threatening the existing groundwater dependent ecosystems. There are at least 40 registered sites on the property -AAPA seems not to have understood the impact of the water extraction and has issued certificates for the well heads only. The aquifer affected also does not sit only within the boundaries of the property and there will be impact to neighbouring properties, communities (Ali Crung) and sites.
