

DRAFT

Environmental Impact Statement

**Proposed Barramundi Fish Farm at Port Patterson,
Northern Territory**

Prepared by
Enesar Consulting Pty Ltd

for
MARINE HARVEST

May 2006

(Report No. HO02072/02-Port Patterson EIS)

Contents

Contents	i
Foreword	1
1 Executive Summary	2
1.1 Introduction	2
1.2 Description of Proposal	2
1.3 Objectives of the Proposal	2
1.4 Location	3
1.5 Schedule	3
1.6 Layout and Infrastructure	3
1.7 Preferred Design Criteria for the Facility	4
1.8 Services and Support	5
1.8.1 Transport	5
1.8.2 Staffing	5
1.8.3 Power, Potable Water and Storage	5
1.9 Farm Operation	5
1.9.1 Emissions from the Operation	6
1.9.2 Chemicals	6
1.9.3 Ongoing Management, Maintenance and Administrative Requirements	6
1.10 Decommissioning and Rehabilitation	6
1.11 Legislative Requirements	7
1.12 Alternatives	7
1.13 Existing Environment	7
1.14 Physical and Biological Environment	8
1.15 Port Patterson Baseline Investigation	9

1.16	Port Hurd Pilot Farm Environmental Monitoring Results	9
1.17	Paspaley Pearls Oyster Studies	10
1.18	Risk Assessments	10
1.19	Environmental Management	15
1.20	Public Involvement and Consultation	19
1.21	Conclusions	20
2	Introduction	22
2.1	Background	22
2.2	Objectives and Scope of this Report	22
3	Description of the Proposal	23
3.1	Overview	23
3.2	Objectives, Benefits and Justification for the Project	23
	3.2.1 Background	23
	3.2.2 Objectives	25
	3.2.3 Benefits and Justification	25
3.3	Location of the Project	26
3.4	Project Schedule	27
3.5	Layout and Infrastructure	28
	3.5.1 Infrastructure	28
3.6	Preferred Design Criteria for the Facility	29
	3.6.1 Aims of the Design	29
	3.6.2 Site Limiting Factors	30
	3.6.3 Fish Net Design Criteria	30
	3.6.4 Barge Design Criteria	31
	3.6.5 Mooring Design Criteria	32
3.7	Services and Support	33
	3.7.1 Transport and Boat Movements	33
	3.7.2 Staffing and Servicing Requirements	34
	3.7.3 Barge Facilities	34
	3.7.4 Power, Potable Water Supply and Storage	35
3.8	Farm Operation	35
	3.8.1 Fish Cultivation	35
	3.8.2 Feeding	36
	3.8.3 Pens Inspections and Cleaning	37
	3.8.4 Grading and Counting	38
	3.8.5 Growth and Harvesting	38
	3.8.6 Steel Nets Construction	38
	3.8.7 Ensiler and Domestic Waste Disposal	39
	3.8.8 Emissions	39
	3.8.9 Chemicals	41
	3.8.9.1 Diesel and Fuels	41
	3.8.9.2 Solvents and Cleaners	41
	3.8.9.3 Chemicals, Fuels and Hazardous Materials Register	41

	3.8.10 Ongoing Management, Maintenance and Administrative Requirements	43
3.9	Decommissioning and Rehabilitation	43
3.10	Legislative Requirements	44
	3.10.1 Lease Requirements	44
	3.10.2 Native Title	44
	3.10.3 Compliance with Applicable Standards	44
4	Alternatives	46
4.1	Not Proceeding with the Proposal	46
4.2	Alternative Locations or Layout for the Whole Proposal	46
4.3	Alternatives for Components of the Proposal	47
	4.3.1 Steel Nets	47
	4.3.2 Mooring Devices	47
	4.3.3 Operational Facilities	47
4.4	Alternative Environmental Management Techniques	48
5	Existing Environment	49
5.1	Regional Setting	49
	5.1.1 General	49
	5.1.2 Climatic Factors	49
	5.1.3 Soils and Geomorphology	49
	5.1.4 Water Flows and Quality	50
	5.1.5 Population, Buildings and Infrastructure	51
5.2	Physical and Biological Environment	51
	5.2.1 Existing Environment	51
	5.2.1.1 Hydrology and Water Quality	52
	5.2.1.2 Bathymetry	53
	5.2.1.3 Existing Coastal and Marine Flora Species	53
	5.2.1.4 Existing Marine and Coastal Fauna Species	54
	5.2.2 Air Quality, Noise, Lighting and Visual Amenity	57
5.3	Port Patterson Baseline Investigation	58
	5.3.1 Investigation	58
	5.3.2 Findings	59
	5.3.3 Conclusions	61
6	Potential Impacts from Fin-fish Aquaculture	62
6.1	Potential Impacts from Construction of the Farm	62
6.2	Potential Impacts of Escaped Fish	62
6.3	Potential Impacts from Fish Faeces and Nutrient Loads	62
6.4	Potential Impacts from Excess Feed and Feed Quality	63
6.5	Potential Impacts from Fish Feeding on Naturally-Occurring Food – Removal of Food from the Food Chain	63
6.6	Potential Impacts from Fish Aggregation	63
6.7	Potential Impacts from the Introduction of Diseases and Parasites and the Treatment of Fish using Introduced Chemicals	63

6.8	Potential Impacts from Waste Generation and Hazardous Materials	64
6.9	Potential Impacts from the Loss of Nets	65
6.10	Potential Impacts to Hydrodynamics	65
6.11	Potential Impacts on and from Predators	65
6.12	Potential Impacts on Flora	66
6.13	Potential Impacts on Bird, Reptile, Fish and Mammal Habitats	66
6.14	Potential Impacts on EPBC Act-listed Threatened and Migratory Species	66
6.15	Potential Impacts from Disturbance to Land Surface	67
6.16	Potential Impacts to Air Quality, Noise, Lighting and Visual Amenity	67
6.17	Potential Impacts on Social and Recreational Values	68
6.18	Potential Impacts on Local Infrastructure	68
6.19	Potential Impacts on Archaeological, Historical, Cultural and Aboriginal Sites	69
6.20	Potential Impacts on Marine Traffic	69
6.21	Potential Impacts on Staff of Pest Insects	69
6.22	Potential Impacts from the Farm on Personnel Emergencies	69
6.23	Potential Impacts on the Barramundi Market	70
6.24	Unknown, Unpredictable or Irreversible Impacts	70
7	Assessment of Impacts from the Port Hurd Pilot Farm	71
7.1	Port Hurd Environmental Monitoring Results	71
7.1.1	Port Hurd Investigations	71
7.1.2	Findings	72
7.1.2.1	Gullala Inlet Control Site	72
7.1.3	Implications and Recommendations	74
7.2	Comparison of Port Patterson versus Port Hurd Operations	74
7.3	Paspaley Pearls Oyster Studies	76
8	Discussion of Potential Impacts and Risk Assessment	77
8.1	Construction	79
8.1.1	Risk Assessment	79
8.2	Escaped Fish	79
8.2.1	Interbreeding	79
8.2.2	Disease and Parasite Transfer	80
8.2.3	Competition with Wild Populations and Increased Predation	80
8.2.4	Risk Assessment	80
8.3	Fish Faeces and Nutrient Loads	81
8.3.1	Risk Assessment	82
8.4	Excess Feed and Feed Quality	82
8.4.1	Risk Assessment	82
8.5	Removal of Fish from the Food Chain	83
8.6	Fish Aggregation	84
8.6.1	Risk Assessment	84
8.7	Introduction of Diseases and Parasites	85

	8.7.1	Risk Assessment	85
8.8		Introduction of Chemicals from Treatment of Fish Parasites or Diseases	86
	8.8.1	Risk Assessment	87
8.9		Waste Generation and Hazardous Materials	87
	8.9.1	Risk Assessment	87
8.10		Loss of Nets	88
	8.10.1	Risk Assessment	88
8.11		Hydrodynamics	88
	8.11.1	Risk Assessment	88
8.12		Predators	89
	8.12.1	Risk Assessment	89
8.13		Flora	90
	8.13.1	Risk Assessment	90
8.14		Bird, Reptile, Fish and Mammal Habitats	90
	8.14.1	Risk Assessment	91
8.15		EPBC Act-listed Threatened and Migratory Species	91
	8.15.1	Risk Assessment	92
8.16		Land Surface	93
	8.16.1	Risk Assessment	93
8.17		Air Quality, Noise, Lighting and Visual Amenity	93
	8.17.1	Greenhouse Gases	94
	8.17.2	Risk Assessment	94
8.18		Social and Recreational	95
	8.18.1	Risk Assessment	95
8.19		Local Infrastructure	95
	8.19.1	Risk Assessment	95
8.20		Archaeological, Historical, Cultural and Aboriginal Sites	95
	8.20.1	Risk Assessment	96
8.21		Marine Traffic	96
	8.21.1	Risk Assessment	97
8.22		Insect Pests	97
	8.22.1	Risk Assessment	97
8.23		Personnel Emergencies	98
	8.23.1	Risk Assessment	98
8.24		Risk Assessment Summary	98
9		Proposed Mitigation, Management and Monitoring	103
	9.1	Maintenance and Monitoring Manual	103
	9.2	Construction	103
	9.3	Fish Escape	104
	9.4	Disease and Parasite Transfer	104
	9.5	Fish Faeces and Nutrient Loads	106
	9.6	Excess Fish Feed and Feed Quality	107
	9.7	Waste	109
	9.7.1	General Mitigation Measures for Waste	109

9.7.2	Solid Putrescible Waste	109
9.7.3	Sewage and Grey Water	110
9.7.4	Solid Inert Waste	111
9.7.5	Prescribed Waste	111
9.7.6	Dead Farm Fish	112
9.8	Storage, Handling and Containment of Chemical and Hazardous Substances	113
9.9	Nets and Moorings	115
9.10	Hydrodynamics	116
9.11	Water and Sediment Quality	116
9.12	Management of Predators	118
9.13	Bird, Reptile, Fish and Mammal Habitats	119
9.14	Flora	120
9.15	EPBC Act-listed Threatened and Migratory Species	120
9.16	Land Surface	121
9.17	Air Quality, Noise, Lighting and Visual Amenity	122
9.18	Social and Recreational	123
9.19	Archaeological, Historical, Cultural and Aboriginal Sites	124
9.20	Marine Traffic	124
9.21	Mitigation of Nuisance and Health Risks from Pest Insects	125
9.22	Personnel Emergencies	125
9.23	Management and Monitoring of Quality of Farmed Barramundi	126
10	Environmental Management	127
10.1	Company Health Safety Environment and Quality Policy	127
10.1.1	Objectives	127
10.2	Operational Standards	128
10.3	Standard Operational Procedures	129
10.4	Monitoring and Reporting Strategies	129
11	Public Involvement and Consultation	134
11.1	November 2005	134
11.2	Future Consultation	134
12	Conclusions	135
13	References	137
	Information Sheet	138
	Figures	139
	Appendices	140

Appendices

- A Environmental Impact Statement Requirement Letter from Northern Territory Natural Resources, Environment and Heritage
 - B Environmental Impact Statement Guidelines for Port Patterson Proposed Aquaculture Farm
 - C Port Patterson Bathymetry
 - D Port Patterson Baseline Report by Aquenal Pty Ltd
 - E Port Hurd Biennial Report by Aquenal Pty Ltd
 - F Paspaley Pearls Oyster Trials at Port Hurd
 - G Greenhouse Gases Calculations
 - H Fish Feed Residue Monitoring
 - I Marine Harvest Port Hurd Standard Operating Procedures
-
