

ENVIRONMENT PROTECTION LICENCE

(Pursuant to section 34 of the *Waste Management and Pollution Control Act*)

Licensee	ENI AUSTRALIA B.V.
Licence Number	EPL230 - 02
Registered Business Address	ENI AUSTRALIA B.V. 226 Adelaide Terrace Perth WA 6000
ABN	18 092 812 023
Premises Address	N.T. Portion 01637 plan(s) CP 004183 NEMARLUK
Anniversary Date:	10 February
Commencement Date:	10/02/2025
Expiry Date:	09/02/2030
Scheduled Activity	<p>Operating an onshore gas plant as part of the Blacktip Gas Project within the meaning of the <i>Trans-Territory Pipeline and Blacktip Gas Projects (Special Provisions) Act 2005</i>.</p> <p>Operating premises for processing hydrocarbons so as to produce, store and /or despatch liquefied natural gas or methanol, where:</p> <p>(a) the premises are designed to produce a maximum scale of 1 055 300 tonnes of gas and 50930 tonnes of condensate per annum; and</p> <p>(b) no lease, licence or permit under the <i>Petroleum Act</i> or the <i>Petroleum (Submerged lands) Act</i> relates to the land on which the premises are situated.</p>

ENVIRONMENT PROTECTION LICENCE 230 - 02

Description

This licence authorises the operation of the **premises** for processing and storage of hydrocarbons. Following the cessation of production, it authorises the storage of liquefied natural gas at the **premises**.

ENVIRONMENT PROTECTION LICENCE 230 - 02

ENVIRONMENT PROTECTION LICENCE 230 - 02

INFORMATION ABOUT THIS LICENCE

- This licence does not in any way relieve the licence holder from its obligations to comply with the WMPC Act, including the general environmental duty in section 12 of the WMPC Act and the duty to notify of incidents causing or threatening to cause pollution under section 14 of the WMPC Act.

Duration of a licence (section 40, 43 and 45 of the WMPC Act)

- A licence will remain in force until its expiry date or until it is surrendered by the licensee or is suspended or cancelled in accordance with the WMPC Act.
- The licensee must notify the Northern Territory Environment Protection Authority (NT EPA) within 14 days after ceasing to conduct the activity.
- The licensee may, with the approval of the NT EPA, surrender the licence to the NT EPA.

Amendment or Revocation of a licence (section 37 of the WMPC Act)

- The licensee may apply to amend or revoke a condition of this licence.
- A fee applies and the application must be made using the designated form via NT EPA Online.
- The NT EPA may also amend or revoke a condition of this licence as set out in section 38 of the WMPC Act.

Transfer of a licence (section 46 of the WMPC Act)

- The licensee can apply to transfer their licence to another person.

Renewal of a licence (section 40 of the WMPC Act and section 3 of the Regulations)

- The licensee may apply for the renewal of their licence not earlier than 90 days, and not later than 30 days, before their licence expires.
- A fee applies and the application must be made via NT EPA Online.

Public Register

- A copy of environment protection licences and any plans for environmental management, reports, submissions or documents required as a condition of an environment protection licence, will be placed on a register in accordance with section 9 of the WMPC Act.
- A copy of the Annual Return will be placed on the register.
- The NT EPA makes this register freely available from the NT EPA website.

Environment Protection Objectives (Part 4 of the WMPC Act), and Water Quality Standards (section 73 of the *Water Act 1992*)

- An Environment Protection Objective (EPO) is a statutory instrument to establish principles on which:
 - a. environmental quality is to be maintained, enhanced, managed or protected;
 - b. pollution, or environmental harm resulting from pollution, is to be assessed, prevented, reduced, controlled, rectified or cleaned up; and
 - c. effective waste management is to be implemented or evaluated.
- In accordance with section 18 of the WMPC Act a beneficial use, quality standard, criteria or objective declared under section 73 of the *Water Act 1992* and in force is an environment protection objective for the purposes of the WMPC Act.

ENVIRONMENT PROTECTION LICENCE 230 - 02

- The following EPOs and Beneficial Use Declarations (BUDs) are relevant to this licence:

Environmental Interests

- This section highlights sensitivity of the surrounding land use and environment associated with the location of the approved activity:
 - Walpinhti Reef Exclusion Zone.
- In conducting the Licensed Activity, the licensee shall do all things reasonable and practicable to ensure the Licensed Activity does not adversely affect the ambient air quality of the region.

Cultural Interests

- It is the licensee's responsibility to contact the Aboriginal Areas Protection Authority, appropriate land council or other governing body and ensure that any Authority Certificates required as a result of conducting the licenced activity are obtained and complied with.

ENVIRONMENT PROTECTION LICENCE 230 - 02

RULES FOR INTERPRETING THE CONDITIONS OF THIS LICENCE

- Where there is a discrepancy between the conditions of this licence and any plan, standard, guideline or other document referred to in this licence, the conditions of this licence prevail to the extent of the inconsistency.
- Any reference to any standard (Australian or international) in this licence means the relevant parts of the current version of that standard.
- A reference to any guideline or code of practice (or to the relevant parts of any guideline or code of practice) in this licence means the current version of the guideline or code of practice.
- Under section 39 of the WMPC Act, any contravention of or failure to comply with this licence by the licensee may be an offence.
- In determining whether the licensee has committed an offence, the licensee may be liable for the conduct of its directors, employees or agents.
- The licensee should ensure that each of its directors, employees, contractors or agents are aware of, and comply with, this licence.
- In this licence, unless the contrary intention appears, words that are defined in the WMPC Act are intended to have the meaning given to them in that Act.

ENVIRONMENT PROTECTION LICENCE 230 - 02

LICENCE CONDITIONS

GENERAL

- 1 The licensee must ensure the contact details recorded in NT EPA Online for this licence are correct at all times.
- 2 The licensee must at all times have a 24 hour emergency contact.
- 3 The licensee must cause clear and legible signage, in English, to be displayed in a prominent location at each public entrance to the premises that includes the following details:
 - 3.1 environment protection licence number issued under the WMPC Act; and
 - 3.2 24 hour emergency contact details.
- 4 The licensee must cause a copy of this licence to be available for inspection by any person, in hard copy form, at the premises.
- 5 The licensee must provide to the NT EPA, within 10 business days of a request, a copy of any document, monitoring data or other information in relation to the activity, in the format requested by the NT EPA.
- 6 All notices, reports, documents or other correspondence required to be provided as a condition of this licence, unless otherwise specified as a condition of this licence, must be provided in electronic form by uploading the document via NT EPA Online (or by emailing environmentalregulation@nt.gov.au).
- 7 The NT EPA may require the licensee to revise or amend and resubmit any document. Where the NT EPA requires a document to be resubmitted, the licensee must submit it to the NT EPA by the date specified by the NT EPA.
- 8 The licensee must implement, maintain and follow the documents listed in Table 1.

Table 1. Licence documents

Document Name	Document ID
Onshore Environmental Management Plan	000036_DV_PR.HSE.0684.000_05
Blacktip Operations Emergency Response Plan	000036_DV_PR.HSE.0675.000_10
Blacktip Operations Oil Pollution Emergency Plan	000036_DV_PR.HSE.0388.000
Blacktip Operations and Scientific Monitoring Program	000036_DV_PR.HSE.0860.000_06
Produced Formation Water Plan for EPL230-01	710100PORVX0825_PROP00_389
Blacktip Project Produced Water Management Plan (2010)	00036_DV_EX.HSE.0381.000_A03
Eni Australia Blacktip Flaring Management Plan (2009)	000036_DV_EX.HSE.0679.000_A01
Blacktip Offshore Environment Plan [as it applies to activities within NT waters] (2020)	000036_DV_PR.HSE.0677.000_16

- 9 Within 10 business days of any amendment being made to a document listed in Table 1 the licensee must provide the amended document to the NT EPA, along with:
 - 9.1 a tabulated summary of the amendment(s) with document references;
 - 9.2 reasons for the amendment(s); and
 - 9.3 an assessment of environmental risk associated with the amendment(s).

ENVIRONMENT PROTECTION LICENCE 230 - 02

- 10 The licensee must, for the duration of this licence, implement, maintain and follow a Communication Plan which includes a strategy for communicating with persons who are likely to have a real interest in, or be affected by, the activity.
- 11 The licensee must operate and maintain a community feedback number.
- 12 The licensee must maintain a Complaint Log for all complaints received by the licensee in relation to the activity.
- 13 The licensee must ensure that the Complaint Log includes, for each complaint received by the licensee, the following information:
 - 13.1 the person to whom the complaint was made;
 - 13.2 the person responsible for managing the complaint;
 - 13.3 the date and time the complaint was reported;
 - 13.4 the date and time of the event(s) that led to the complaint;
 - 13.5 the contact details of the complainant if known, or where no details are provided a note to that effect;
 - 13.6 the nature of the complaint;
 - 13.7 the nature of event(s) giving rise to the complaint;
 - 13.8 prevailing weather conditions at the time (where relevant to the complaint);
 - 13.9 the action taken in relation to the complaint, including any follow-up contact with the complainant; and
 - 13.10 if no action was taken, why no action was taken.
- 14 The licensee must implement, maintain and follow an Emergency Response Plan that addresses procedures for responding to emergencies associated with the activity that may cause environmental harm.

EARLY SURRENDER OF LICENCE

- 15 Any reports, records or other information required or able to be provided by the licensee under this licence must be submitted to the NT EPA prior to the licensee surrendering the licence. If the date on which a report, record or other information is required falls after the date the licensee requests to surrender this licence, the licensee must provide the report, record or information as far as possible using data available to the licensee up to and including the date the request to surrender the licence is made.

OPERATIONAL

- 16 The licensee must, without limiting any other condition of this licence, in conducting the Licensed Activity, do all things reasonable and practicable to ensure the Licensed Activity does not adversely affect the relevant Declared Beneficial Uses and Objectives as declared from time to time.
- 17 The licensee must ensure any plant and equipment used by the licensee in conducting the activity:
 - 17.1 is fit for the purpose and use to which it is put;
 - 17.2 is maintained;

ENVIRONMENT PROTECTION LICENCE 230 - 02

17.3 is operated by a person trained to use the plant and equipment.

18 No change, replacement or alteration of plant or equipment is permitted if the change, replacement or alteration increases the risk of environmental harm from the Licensed Activities, unless approved in writing by the NT EPA.

19 The licensee must ensure that all instruments, equipment and measuring devices used for measuring or monitoring in accordance with any condition of this licence are calibrated, appropriately operated and maintained.

20 The licensee must ensure all analyses and tests required to be conducted in accordance with this licence are carried out by a laboratory that has NATA certification for the analysis and test, except as otherwise authorised by the NT EPA.

21 **Waste Management**

The licensee must segregate waste at the premises in clearly designated areas.

22 The licensee must ensure:

22.1 that all listed waste being transported from the premises is transported by a person licensed to transport the listed waste; and

22.2 waste is transported to facilities that are licensed to accept the waste and are capable of containing and/or treating the waste.

23 The licensee must maintain records of the nature, quantities, source and disposal of waste, including Listed Waste, generated at the premises in each successive 12-month period following the commencement date of this licence.

24 The Onshore Environmental Management Plan (OEMP) must:

24.1 be prepared in accordance with the *NT EPA Guideline for the Preparation of an Environmental Management Plan*;

24.2 include environmental management strategies for greenhouse gas emissions;

24.3 outline measures to ensure:

- a. continuous improvement in environmental management practices and environmental performance for the licensed activity;
- b. the minimisation of emissions, discharges and wastes as far as is reasonable and practicable for the licensed activity; and
- c. management of foreseeable environmental risks and hazards for non-routine situations including corrective responses to prevent and mitigate environmental harm, including shut down periods for maintenance or other reasons;

24.4 be prepared by a suitably qualified person with the experience and qualifications to be able to assess the environmental risks associated with carrying out the Licensed Activity and to assess the adequacy of the OEMP to facilitate compliance with the conditions of this licence; and

24.5 not be implemented or amended in a way that contravenes or is inconsistent with any condition of the licence.

25 **Licence Audit**

The licensee must submit a licence audit report that evaluates the extent to which the licensee is compliant with all the conditions of this licence by:

25.1 15 May 2027 for the period from the issue date of this licence to 9 February 2027; and

ENVIRONMENT PROTECTION LICENCE 230 - 02

25.2 15 May 2029 for the period from 10 February 2027 to 9 February 2029.

26 The licence audit must be conducted by a suitably qualified person.

DISCHARGES AND EMISSIONS

27 **General**

The licensee must ensure there is no migration or overflow of a contaminant or waste which causes or may cause environmental harm beyond the boundary of the land specified in Figure 1 of Attachment A on which the premises are located. For the avoidance of doubt, this condition is not intended to authorise the discharge of a contaminant or waste to any land or water which discharge has not been specifically authorised by another condition of this licence.

28 The licensee must ensure that stormwater does not come into contact with a contaminant or waste, which causes or may cause environmental harm.

Water and Wastewater Discharges

29 This licensee must ensure that all discharges of wastewater only occur from the authorised discharge points identified in Table 1 of Attachment B and as otherwise authorised in accordance with the conditions of this licence.

30 The licensee must, for Produced Formation Water and Treated Wastewater Effluent authorised discharge points, install, operate and maintain a device to measure and record, for each discharge event:

30.1 the time the discharge commenced and the duration of the discharge;

30.2 the discharge rate of flow; and

30.3 the discharge volume.

31 The licensee must ensure that the discharge from all discharge events at each authorised discharge point does not exceed the licence limits specified for that discharge point in Table 2 of Attachment B.

32 The licensee must ensure that the discharge from all discharge events at each authorised discharge point does not:

32.1 contain any floating debris, oil, grease, petroleum hydrocarbon sheen, scum, litter or other objectionable matter;

32.2 cause or generate odours which would adversely affect the use of surrounding waters;

32.3 cause algal blooms in the receiving water;

32.4 cause visible change in the behaviour of fish or other aquatic organisms in the receiving water;

32.5 cause mortality of fish or other aquatic organisms; or

32.6 cause adverse impacts on plants.

Air Emissions

33 The licensee must ensure that discharges to air only occur from the authorised air emission points identified in Table 3 of Attachment B and as otherwise authorised in accordance with the conditions of this licence.

34 The licensee must ensure that emissions to air from all emission events at each authorised air emission point do not exceed the limits specified in Table 3 of Attachment B.

35 The licensee must measure and record fuel/gas flow from the flow meters listed in Attachment C.

ENVIRONMENT PROTECTION LICENCE 230 - 02

- 36 The licensee must ensure all releases to air from the authorised air emission points:
- 36.1 are directed vertically upwards without impedance or hindrance; and
 - 36.2 are freely discharged after release.
- 37 **Flaring**
The licensee must take all reasonable and practicable measures to ensure all flares:
- 37.1 are designed, operated and maintained to minimise emission of volatile organic compounds and smoke;
 - 37.2 are equipped with a continuously burning pilot or other automatic ignition system that assures gas ignition and provides immediate notification to appropriate personnel when the ignition system ceases to function;
 - 37.3 are designed to handle large fluctuations in both the volume and the chemical content of gases; and
 - 37.4 are designed to not cause excessive radiant heat, light or noise beyond the boundary of the premises.
- 38 **Ambient Air Quality**
The activity must not cause or release, beyond the boundary of the premises:
- 38.1 visible steam;
 - 38.2 smoke;
 - 38.3 offensive odour;
 - 38.4 dust or particulates; or
 - 38.5 noise which unreasonably interferes with or is likely to unreasonably interfere with the enjoyment of the area by persons who occupy a place within the area or are otherwise lawfully in the area.
- 39 **Fugitive Emissions**
The licensee must take all reasonable and practicable measures to minimise fugitive volatile organic compound emissions. Reasonable and practicable measures include, but are not limited to:
- 39.1 implementing a leak detection and repair program to regularly test units/components including flanges, valves, gaskets, seals and connection of pumps, pipes and controls, vessels and tanks that are most likely to leak; and
 - 39.2 implementing industry standard management procedures for inspection, maintenance and, if required, change-out of flanges for pressurised systems.
- 40 **Storage and Handling of Chemicals, Flammables and Combustible Substances**
The licensee must keep records of the chemical content, type, volume, storage location and use of all firefighting foam.
- 41 All fluorine-containing substances used for testing of firefighting systems and training must be contained and must not contaminate land or waters or air.

MONITORING

- 42 **Monitoring Discharges to Water and Surrounding Environments**
The licensee must maintain and implement an environmental monitoring program for discharges to water, land and air from the licenced activity in accordance with the monitoring requirements included in Attachment B from the commencement date of this licence.

ENVIRONMENT PROTECTION LICENCE 230 - 02

- 43 The licensee must ensure that for each sample collected in accordance with the requirements of this licence the following information must be recorded and retained:
- 43.1 the date on which the sample was collected;
 - 43.2 the time at which the sample was collected;
 - 43.3 the location at which the sample was collected;
 - 43.4 the name of the person who collected the sample;
 - 43.5 the chain of custody forms relating to the sample;
 - 43.6 the field measurements (if any) and analytical results (if any) relating to the sample; and
 - 43.7 laboratory quality assurance and quality control documentation.
- 44 The licensee must ensure that all samples and field environmental data are representative of the conditions at the time of sampling.
- 45 The licensee must ensure that all samples and field environmental data are collected in accordance with recognised Australian Standards and guidelines (such as AS/NZS 5667, ANZECC/ARMCANZ)
- 46 The licensee must ensure any samples collected in accordance with the requirements of this licence are obtained by, or under the supervision of, a qualified sampler.
- 47 The licensee must ensure all sampling and analysis of water pollutants are carried out in accordance with NSW Department of Environment and Conservation and NSW EPA *Approved Methods for the Sampling and Analysis of Water Pollutants in New South Wales*.
- 48 The licensee must for all land-based monitoring points specified in Table 2 and 4 of Attachment B:
- 48.1 install and maintain appropriate identification signage so that they are reasonably identifiable at all times; and
 - 48.2 maintain safe access and egress, as is reasonably practicable.
- 49 The licensee must ensure annual marine sediment and biota monitoring is conducted by a suitably qualified person, in accordance with the latest version of the Onshore Environmental Management Plan and the National Assessment Guidelines for Dredging 2009 (Commonwealth of Australia).
- 50 **Monitoring Air Emissions**
The licensee must maintain and implement an environmental monitoring program for discharges to air from the licenced activity in accordance with the monitoring requirements included in Table 3 of Attachment B.
- 51 The licensee must ensure all sampling and analysis of air emissions are carried out in accordance with NSW EPA *Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales*.
- 52 Monitoring of air emissions must be undertaken at least once per year when the emission source is operating under routine steady state operating conditions.

RECORDING AND REPORTING

- 53 **Annual Report**
The licensee must submit a completed Annual Return form to environmentalregulation@nt.gov.au within 20 business days after each anniversary date of this licence, which relates to the preceding 12 month period.

ENVIRONMENT PROTECTION LICENCE 230 - 02

- 54 The licensee must complete and provide to the NT EPA an Annual Environmental Monitoring Report (AEMR), as prescribed by this licence, by 15 May for each year of this licence. The reporting period is the preceding 12 month period starting from the commencement date of this licence.
- 55 The licensee must ensure that each AEMR:
- 55.1 is prepared in accordance with the requirements of the NT EPA 'Guideline for Reporting on Environmental Monitoring' (or any other guideline as adopted by the NT EPA from time to time);
 - 55.2 includes a tabulation, in Microsoft ® Excel ® format, of all monitoring data required as a condition of this licence;
 - 55.3 includes long term trend analysis, including statistical analysis, of monitoring data to demonstrate any environmental impact associated with the activity over a minimum period of five years;
 - 55.4 summarises performance of the authorised discharges to water and air emissions compared to the limits and values specified in Attachment B;
 - 55.5 reports the frequency and volume of wastewater discharges via the authorised discharge points and air emissions via authorised air emission points for the reporting period;
 - 55.6 provides the total emissions to air in tonnes per year, with respect to the parameters listed in Attachment B;
 - 55.7 includes analysis of environmental impacts and measures taken to reduce environmental impacts arising from Licensed Activities, including wastewater and ambient air quality improvements;
 - 55.8 summarises measures taken to reduce waste;
 - 55.9 is prepared by a suitably qualified person;
 - 55.10 details the progress and implementation of Performance Improvement conditions of this licence;
 - 55.11 includes comparison of measured groundwater quality against the interim concentration limits in Table 4 of Attachment B or site-specific guideline values and concentration limits as approved by the NT EPA from time to time; and
 - 55.12 highlights all instances of exceedances of trigger values and limits specified in Attachment B.
- 56 **Non-Compliance**
The licensee must keep records of all non-compliances with this licence. These records must be adequate to enable the licensee to comply with the non-compliance notification conditions of this licence.
- 57 A non-compliance with this licence includes:
- an exceedance of a limit or a measurement outside the limit range as specified in Attachment B; and
 - the exceedance of a trigger value specified in Attachment B on three consecutive sampling occasions.
- 58 The licensee must notify the NT EPA of any non-compliance with this licence by completing the Non-Compliance Notification via NT EPA Online (or by emailing environmentalregulation@nt.gov.au), as soon as practicable (and in any case within 24 hours after) after first becoming aware of the non-compliance.
- 59 The licensee must include in the notification of non-compliance the following information:

ENVIRONMENT PROTECTION LICENCE 230 - 02

- 59.1 when the non-compliance was detected and by whom;
- 59.2 the date and time of the non-compliance; and
- 59.3 a date when an incident investigation report will be submitted to the NT EPA in accordance with condition 60 of this licence.

60 Within 10 business days of the notification report provided in accordance with condition 59, the licensee must provide an investigation report to the NT EPA, including:

- 60.1 the date and time when the non-compliance was detected and by whom;
- 60.2 the risk of environmental harm arising from the non-compliance;
- 60.3 if no action was taken, why no action was taken;
- 60.4 corrective actions that have or will be undertaken to ensure the non-compliance does not reoccur;
- 60.5 the action(s) that have or will be undertaken to mitigate any environmental harm arising from the non-compliance; and
- 60.6 the actual and potential causes and contributing factors to the non-compliance.

PERFORMANCE IMPROVEMENT

61 **Groundwater Monitoring Program**

The licensee must provide an updated Groundwater Monitoring Program by 15 May 2026 including site specific guidance values and/or concentration limits for each monitoring point for each contaminant of concern listed in Table 4 of Attachment B.

62 The licensee must submit supporting documentation demonstrating that the updated Groundwater Monitoring Program required by condition 61 is informed by hydrogeological groundwater modelling that addresses the local hydrogeology and its interaction with site features, including:

- the movement of groundwater to determine hydraulic gradient, potential aquifer mounding and flow direction of all on-site bores;
- identifying potential receptors (groundwater users);
- an estimate of the possible fate and migration of contaminants of concern;
- on-site potable water production;
- on-site treatment water infiltration areas;
- surface water run-off drains;
- off-site saline water wedge intrusion/tidal influence from nearby coastline; and
- a groundwater-specific environmental risk assessment.

63 The Groundwater Monitoring Program must be prepared by a suitably qualified person.

64 **Produced formation water and wastewater quality improvements**

The licensee must submit an updated Produced Formation Water and Wastewater Management Plan to the NT EPA by the first anniversary of this licence. The updated plan must include:

- A summary of the investigations, actions, trials, upgrades, maintenance and/or operational changes proposed to be undertaken to improve produced formation water quality to meet the concentration limits specified in Table 2 of Attachment B; and
- A Trigger Action Response Plan (TARP) aimed at ensuring compliance with concentration limits measured at all wastewater authorised discharge points.

ENVIRONMENT PROTECTION LICENCE 230 - 02

- 65 The Produced Formation Water and Wastewater Management Plan must be prepared by a suitably qualified person.

END OF LICENCE CONDITIONS

This licence is not valid unless signed below:

Claudia Hunter
A/Director Environmental Regulation
Delegate of the Northern Territory
Environment Protection Authority
Dated: 24/04/2025

ENVIRONMENT PROTECTION LICENCE 230 - 02

DEFINITIONS

All terms in the Licence which are defined in the *Waste Management and Pollution Control Act* have the meaning given in that Act unless otherwise or further defined in this section.

DEFINITION	In this licence, unless a contrary intention appears:
24 hour emergency contact	the phone number of a person who can be contacted at any time and be capable of responding to and providing information about any incident associated with the activity.
Activity	the Scheduled activity as described on the covering page of this licence.
Annual Return	an NT EPA prescribed format for demonstrating and reporting compliance with the conditions of this licence and providing information on waste volumes for the preceding 12 month period.
ANZECC/ARMCANZ	Australian and New Zealand Environment and Conservation Council and Agriculture and Resource Management Council of Australia and New Zealand, 2000: National Water Quality Management Strategy: Australian Guidelines for Water Quality Monitoring and Reporting.
Contaminant	a solid, liquid or gas or any combination of such substances and includes: (a) noise, odour, heat and electromagnetic radiation; (b) a prescribed substance or prescribed class of substances; and (c) a substance having a prescribed property or prescribed class of properties.
Discharges	allow a liquid, gas or other substance to flow out from where it has been confined.
Environmental audit	has the meaning given in section 47 of the WMPC Act.
Environmental harm	(a) any harm to or adverse effect on the environment; or (b) any potential harm (including the risk of harm and future harm) to or potential adverse effect on the environment, of any degree or duration and includes environmental nuisance.
Incident	includes: (a) an accident, emergency or malfunction; and (b) a deliberate action, whether or not that action was taken by the person conducting the activity in the course of which the incident occurred.
Land	includes water and air on, above or under land.
Listed waste	a waste included under Schedule 2 of the Regulations.
NATA	National Association of Testing Authorities, Australia.
Non-compliance	failure or refusal to comply, whether by act or omission, with obligations or requirements and includes any exceedance of a licence limit.
Non-compliance notification	an NT EPA prescribed format for notifying the NT EPA of a non-compliance.
NT EPA Online	online system for Environment Protection Licence (EPL), Environment Protection Approval (EPA) and Waste Discharge Licence (WDL) lodgement and maintenance.
Premises	the premises identified in this licence which includes equipment, plant and structures, whether stationary or portable, and the land on which premises are

ENVIRONMENT PROTECTION LICENCE 230 - 02

situated.

Point source discharge	means any discernible, confined or discrete conveyance from which contaminants or waste are or may be discharged.
Qualified sampler	a person who has training and experience in obtaining samples from the relevant environmental medium.
Regulations	<i>Waste Management and Pollution Control (Administration) Regulations 1998.</i>
Stormwater	water flowing over ground surfaces, in natural streams and drains as a direct result of rainfall over a catchment and consists primarily of rainfall runoff.
Suitably qualified person	means a person who has professional qualifications, training, skills or experience relevant to the nominated subject matter and can give authoritative assessment, advice and analysis to performance relative to the subject matter using the relevant protocols, standards, methods or literature.
Trigger values	assigned value for each indicator used to assess the risk to an environmental value, a value that initiates some type of pre-defined management action.
Waste transport certificate	the NT EPA waste tracking documentation used to track listed waste being transported interstate as required in accordance with the National Environment Protection (Movement of Controlled Waste Between States and Territories) Measure.
Water	includes: (a) surface water, ground water and tidal waters; (b) coastal waters of the Territory, within the meaning of the <i>Coastal Waters (Northern Territory Powers) Act 1980</i> of the Commonwealth; and (c) water containing an impurity.
Wastewater	water that contains a contaminant or waste.
WMPC Act	the Northern Territory <i>Waste Management and Pollution Control Act 1998.</i>
