Section 3. Report of Non-compliance

Please supply the following details for each non-compliance not reported to the NT EPA identified in Section 2. Use a separate page for each non-compliance.

The date and time of the non-compliance.
03/12/2024
When the non-compliance was detected and by whom.
7:30am by Damien Brabrook. As agreed the NT EPA was notified at the beginning of a discharge event and followed by notifying when rains were over and discharge completed.
The actual and potential causes and contributing factors to the non-compliance.
Overnight rain caused overflow. The catchment area of the Stuart Highway drain is very large and causes a large influx of water onto the property.
The risk of environmental harm arising from the non-compliance.
The risk of environmental harm arising from the non-compliance is considered low for the following reasons: - Discharges occur from this location every wet season, wastewater is heavily diluted by rainwater and flows towards a catchment that is subject to runoff from similar surrounding land uses (agricultural/historical).
The action(s) that have or will be undertaken to mitigate any environmental harm arising from the non-compliance.
Surface water monitoring upstream and downstream continued as per EPL conditions to monitor water quality.
Corrective actions that have or will be undertaken to ensure the non-compliance does not reoccur.
Continue to irrigate wastewater when possible, ensuring compliance with the Irrigation Management Plan.
If no action was taken, why no action was taken.
