

Good afternoon NTEPA,

Apologies on behalf of Litchfield Council for the late submission.

Please accept the below on behalf of Litchfield Council.

The project details provided, and deadline for responses, has not allowed council and the community sufficient opportunity to adequately assess the project's potential environmental impacts. Acknowledging the scale and potential impacts the Sun Cable Australia-Asia Powerlink project may have on our community, we request that future phases of the EIS process provide sufficient notice and project details to facilitate informed feedback.

Regards

Stephen Hoyne
Chief Executive Officer
