Thank you for the opportunity to comment on the 'GEMCO J Quarry Haul Road Realignment Project Referral'.

The Mines Division of the Department of Industry, Tourism and Trade (DITT) have reviewed the documents and provide comments at attachment A.

DITT Response to NT EPA – GEMCO J Quarry Haul Road Realignment Project

NT EPA Considerations for Comment

NT EPA Question	DITT Response
Whether the proposal has the potential to have a significant impact on the environment (social, cultural, physical, biological, economic), from your perspective	No. The proposal describes realignment of the haul road to reduce impacts to culturally sensitive areas.
Whether the relevant NT EPA environmental factors that could potentially be significantly impacted, and the specific potential significant impact/s, are identified and addressed in the referral	Yes, relevant environmental factors and potential impacts have been addressed.
Whether additional information is required, and if so, the specific nature and details of the additional information that is required	Details pertaining to the construction of the haul road e.g dimensions and drainage infrastructure are required but can be provided in the Mining Management Plan and assessed under the <i>Mining Management Act 2001</i> .
If you feel that the referral has adequately addressed your concerns or issues, are there any management conditions (relating to certain aspects of the proposal) you would suggest including in an environmental approval (if approved). If so, provide details and reasoning in your submission.	Referral has adequately addressed concerns relevant to DITT. Any management conditions relevant to the <i>Mining Management Act 2001</i> will be addressed through submission of a Mining Management Plan.
