---

Good morning,

I have reviewed the GEMCO J Quarry Haul Road Realignment Project Referral and can confirm that all heritage and archaeological issues have been adequately addressed for this project for the time being.

Extensive archaeological surveys of the project area have been conducted and no sites were found or are expected to be impacted by the project. In the event that any suspected archaeological sites are discovered, an 'Unexpected Finds' protocol will be implemented as a precautionary measure. Other mitigation measures will also be implemented, so Heritage Branch have no further concerns with this project.
