

**McArthur River Mine
Overburden Management Project**

Table of Contents

Draft Environmental Impact Statement

Document Overview

Volume 1	Glossary
	Executive Summary
Chapter 1	Introduction
Chapter 2	Legislative Framework
Chapter 3	Project Description and Justification
Chapter 4	Decommissioning, Rehabilitation and Closure
Chapter 5	Project Alternatives
Chapter 6	Materials Characterisation
Chapter 7	Project Risk Assessment
Volume 2	Chapter 8 Water Resources
	Chapter 9 Biodiversity
	Chapter 10 Matters of National Environmental Significance
	Chapter 11 Cultural Heritage
	Chapter 12 Socio-Economic Environment
	Chapter 13 Air Quality
	Chapter 14 Health and Safety
Volume 3	Chapter 15 Environmental Management Plan
	Chapter 16 References
	Appendix A Final Terms of Reference
	Appendix B Terms of Reference Cross Reference Table
	Appendix C EIS Project Team
	Appendix D Climate Change Assessment Methodology
	Appendix E Conceptual Model Report
	Appendix F Failure Modes and Effects Analysis Report
	Appendix G Final Risk Assessment Workshop Report
	Appendix H NOEF Historical Construction and Drilling Report
	Appendix I MRM NOEF 7.5m Assessment Case Report
Volume 4	Appendix J NOEF Cover System and Landform Design Report
	Appendix K Erosion Assessment for OEF Landform Configurations
	Appendix L Kinetic Geochemistry Report
Volume 5	Appendix M Static Geochemistry Report
Volume 6	Appendix N Geotechnical Assessment Report
	Appendix O NOEF Closure Monitoring System Report
	Appendix P NOEF Mine Drainage Report

	Appendix Q	NOEF Mitigation Options Report
Volume 7	Appendix R	TSF – Life of Mine Plan
	Appendix S	Conceptual Mine Closure Plan
Volume 8	Appendix T	Groundwater Impact Assessment Report – Part 1
Volume 9	Appendix T	Groundwater Impact Assessment Report – Part 2
Volume 10	Appendix T	Groundwater Impact Assessment Report – Part 3
Volume 11	Appendix U	Surface Water Impact Assessment Report
	Appendix V	Final Void Limnology Assessment Report
	Appendix W	Aquatic Ecology Impact Assessment Report
Volume 12	Appendix X	Terrestrial Ecology Impact Assessment Report
	Appendix Y	Stakeholder Consultation Report
	Appendix Z	Economic Impact Assessment Report
	Appendix AA	Air Quality Impact Assessment Report
	Appendix AB	EIS Commitments
	Appendix AC	Tailings Deposition into Open Pit Consolidation Modelling
	Appendix AD	NOEF Surface Water Management Sediment Dams and Stilling Basins
	Appendix AE	Borrow Pit and NOEF Subsoil Drainage Designs
	Appendix AF	Spontaneous Combustion Technical Report
	Appendix AG	Borrow Pit Design Process Guidelines
	Appendix AH	MRM Clay Borrow Areas

Table of Contents

G.	Glossary.....	G-1
E.	Executive Summary.....	E-1
E.1	Project Location and Background.....	E-2
E.2	Project Proponent.....	E-4
E.3	Legislative Framework.....	E-4
E.3.1	Northern Territory Environmental Assessment Process.....	E-4
E.3.2	Commonwealth Environmental Assessment Process.....	E-4
E.4	Project Description.....	E-5
E.4.1	Project Overview.....	E-5
E.4.2	Project Definition Process	E-9
E.4.3	Project Scope and Key Changes	E-9
E.5	Project Need and Benefits	E-13
E.5.1	Project Need.....	E-13
E.5.2	Project Benefits	E-13
E.6	Project Alternatives.....	E-14
E.7	Materials Characterisation.....	E-14
E.8	Project Risk Assessment	E-15
E.9	Water Resources	E-18
E.10	Biodiversity	E-20
E.11	Air Quality.....	E-21
E.12	Cultural Heritage.....	E-22
E.13	Socio-economic Environment	E-23
E.14	Health and Safety.....	E-24
E.15	Environmental Management Plan.....	E-25
1	Introduction.....	1-1
1.1	Overview.....	1-1
1.2	Background and History	1-1
1.3	MRM Environmental Management.....	1-3
1.4	EIS Scope and Approach.....	1-4
1.5	Project Definition and Assessment.....	1-6
1.5.1	Project Definition Process	1-6
1.5.1.1	Baseline Assessments and Investigations.....	1-6
1.5.1.2	Establishment of Project Closure Objectives.....	1-7
1.5.1.3	Establishment of Project Domains.....	1-7
1.5.1.4	Identification and Assessment of Project Alternatives	1-7
1.5.1.5	Project Risk Identification and Assessment	1-7
1.5.2	Project Changes since the Phase 3 EIS.....	1-8
1.5.2.1	Overburden Classification and Management.....	1-8
1.5.2.2	Open Cut.....	1-8
1.5.2.3	Tailings Storage Facility.....	1-8
1.5.2.4	Water Management System	1-9
1.5.2.5	Life of Mine and Phases.....	1-9
1.6	Current Project Status.....	1-9

1.7	Project Benefits and Justification	1-10
1.8	Potential Future Development.....	1-10
1.9	Project Proponent.....	1-11
1.10	Regional Context	1-11
1.10.1	Mineral Titles, Land Tenure and Land Use.....	1-11
1.10.2	Landmark Features.....	1-12
1.10.3	Sites of Cultural/Social Significance	1-12
1.10.4	Regional Community Centres	1-12
1.10.5	Sensitive Environments.....	1-13
1.10.6	Extent of Resource within the Project area	1-13
1.10.7	Geological Properties of the Project Area	1-14
1.11	Climate and Atmospheric Characteristics	1-14
1.11.1	McArthur River Mine Climate	1-14
1.11.2	Extreme Events.....	1-18
1.11.2.1	Flooding/Cyclones.....	1-18
1.11.2.2	Drought.....	1-18
1.11.2.3	Bushfires	1-18
1.11.2.4	Landslides.....	1-19
1.11.2.5	Earthquakes.....	1-20
1.11.3	Climate Change.....	1-20
1.12	Current Agreements.....	1-21
1.13	Proponents Environmental Record	1-21
1.14	Study Team	1-22
2	Legislative Framework	2-1
2.1	Introduction	2-1
2.2	Legislation	2-1
2.2.1	Commonwealth Legislation and Policy Requirements.....	2-1
2.2.1.1	Environment Protection and Biodiversity Conservation Act 1999	2-1
2.2.1.2	Native Title Act 1993.....	2-2
2.2.1.3	National Greenhouse and Energy Reporting Act 2007.....	2-3
2.2.1.4	Civil Aviation Act 1988.....	2-3
2.2.1.5	National Environment Protection Council Act 1994.....	2-3
2.2.2	Northern Territory Legislation and Policy Requirements.....	2-4
2.2.2.1	Environmental Assessment Act.....	2-4
2.2.2.2	Mining Management Act.....	2-4
2.2.2.3	Mineral Titles Act	2-5
2.2.2.4	McArthur River Project Agreement Ratification Act.....	2-5
2.2.2.5	Water Act.....	2-5
2.2.2.6	Northern Territory Aboriginal Sacred Sites Act.....	2-6
2.2.2.7	Other Relevant Legislation.....	2-6
2.2.3	Local Government Requirements	2-8
2.2.3.1	Roper Gulf Shire Council.....	2-8
2.3	Previous Impact Assessments	2-8
2.3.1	1992 EIS (MRM Underground)	2-8
2.3.2	2005 EIS and 2006 PER (Conversion to Open Cut)	2-8
2.3.3	2012 EIS (Phase 3 Development Project)	2-9

2.4	Independent Monitor	2-9
2.5	Approval Timeframes	2-10
2.6	Codes of Practice, Standards and Guidelines	2-12
3	Project Description and Justification	3-1
3.1	Introduction	3-1
3.1.1	Site Layout	3-2
3.2	Project Definition.....	3-5
3.2.1	Project Definition Exclusions – Phase 3 EIS.....	3-5
3.2.1.1	Ore Processing (Including Processing Facilities, Process Inputs and Outputs)	3-5
3.2.1.1.1	Processing Facilities	3-6
3.2.1.1.1.1	Tailings.....	3-9
3.2.1.1.1.2	Project Products	3-9
3.2.1.2	Concentrate Storage	3-9
3.2.1.3	Concentrate Haulage.....	3-9
3.2.1.4	Product Export.....	3-10
3.2.1.4.1	Bing Bong	3-10
3.2.1.4.2	Bulk Carrier.....	3-10
3.2.1.4.3	Transit Route.....	3-10
3.2.1.4.4	Ship Loading.....	3-11
3.2.1.4.5	Dredging.....	3-11
3.2.1.5	Ancillary Infrastructure:	3-15
3.2.1.5.1	Potable Water Supply	3-15
3.2.1.5.2	Power	3-15
3.2.1.5.3	Fuel Storage.....	3-15
3.2.1.5.4	Explosives and Blasting Agents Storage	3-15
3.2.1.5.5	Sewerage Facilities	3-15
3.2.1.5.6	Telecommunications	3-15
3.2.1.5.7	Accommodation Village.....	3-15
3.2.1.5.8	Airport	3-16
3.2.1.5.9	Mine Infrastructure Area.....	3-16
3.2.1.5.10	Administration Area	3-16
3.2.1.5.11	Mining Fleet.....	3-16
3.2.2	Project Definition Exclusions – MMP	3-17
3.2.2.1	Mining in the Open Cut from Stages H, I and J.....	3-18
3.2.2.2	Rehandling of Low Grade Ore from the NOEF for Processing	3-18
3.2.2.3	Relocation of MS-NAF and PAF Materials	3-18
3.2.2.4	Placement of Temporary SOEF and EOEF	3-18
3.2.2.5	Footwall Cutback.....	3-19
3.2.2.6	Development of NOEF CW Stage	3-19
3.2.2.7	Tailings Deposition in Cells 1 and 2 of the TSF with Seepage Mitigation.....	3-21
3.2.2.8	Construction of Northern Dewatering Bores into the Underground Mine	3-23
3.2.2.9	Construction and Operation of a Water Treatment Plant	3-23
3.2.3	Project Definition – Significant Changes from Phase 3 Project.....	3-24
3.2.4	The Project Relative to Current Operations.....	3-25
3.2.5	Summary of the MRM Operation Approval Status	3-29
3.3	Project Definition Process	3-39

3.3.1	Approach to Post Closure Risks.....	3-39
3.3.1.1	Planning and Design.....	3-39
3.3.1.2	Operational Development.....	3-39
3.3.1.3	Decommissioning and Rehabilitation.....	3-40
3.3.2	Conceptual Understanding and Gap Analysis.....	3-40
3.3.3	Data Gathering and Compilation.....	3-40
3.3.4	Holistic Approach to Project Planning.....	3-41
3.3.4.1	Project Closure Objectives.....	3-41
3.3.4.2	Development of Conceptual Models.....	3-42
3.3.4.3	Options Analysis and Ranking.....	3-43
3.3.4.4	Preliminary Project Definition.....	3-43
3.3.4.5	Failure Modes and Effects Analysis.....	3-43
3.3.5	Stakeholder Consultation.....	3-45
3.3.5.1	Site-wide.....	3-45
3.3.5.2	Approach to Decommissioning and Rehabilitation.....	3-46
3.3.5.3	NOEF Design.....	3-46
3.3.6	Final Project Description.....	3-46
3.4	Project Description.....	3-47
3.4.1	Introduction to the Project Domains.....	3-47
3.4.1.1	Open Cut Domain.....	3-47
3.4.1.2	NOEF Domain.....	3-48
3.4.1.3	TSF Domain.....	3-51
3.4.2	Background Information.....	3-55
3.4.2.1	The Conceptual Site Model Process.....	3-55
3.4.2.2	Potential Sources.....	3-56
3.4.2.2.1	Geochemistry of Potential Sources.....	3-56
3.4.2.2.2	Location of Potential Sources.....	3-57
3.4.2.3	Potential Pathways.....	3-59
3.4.2.3.1	Airborne Transport.....	3-59
3.4.2.3.2	Waterborne Transport.....	3-59
3.4.2.3.2.1	<i>Infiltrated Rainwater</i>	3-59
3.4.2.3.2.2	<i>Groundwater</i>	3-59
3.4.2.3.2.3	<i>Surface Water</i>	3-60
3.4.2.4	Receptors.....	3-62
3.4.2.5	Contaminant Linkages (Source-pathway-receptor Chains).....	3-62
3.4.3	Staged Development Plans.....	3-63
3.4.4	Open Cut Mining Operations Phase (2018-2037).....	3-81
3.4.4.1	Overview.....	3-81
3.4.4.2	Domain 1 – Open Cut.....	3-82
3.4.4.2.1	The Open Cut Mine.....	3-82
3.4.4.2.1.1	<i>Introduction</i>	3-82
3.4.4.2.1.2	<i>Facility Design and Controls</i>	3-82
3.4.4.2.1.3	<i>Summary</i>	3-89
3.4.4.2.2	EOEF.....	3-90
3.4.4.2.2.1	<i>Introduction</i>	3-90
3.4.4.2.2.2	<i>Facility Design and Controls</i>	3-90

3.4.4.2.3	SOEF.....	3-92
3.4.4.2.3.1	Setting	3-92
3.4.4.2.3.2	Historical Development	3-93
3.4.4.2.3.3	Site Conceptualisation	3-95
3.4.4.2.3.4	Facility Design and Controls.....	3-97
3.4.4.2.4	WOEF.....	3-99
3.4.4.2.4.1	Setting	3-99
3.4.4.2.4.2	Historical Development	3-99
3.4.4.2.4.3	Facility Design and Controls.....	3-101
3.4.4.2.5	Source-pathway-receptor Summary	3-101
3.4.4.3	Domain 2 –NOEF.....	3-104
3.4.4.3.1	Overview of the NOEF Solution	3-104
3.4.4.3.2	Existing NOEF	3-106
3.4.4.3.2.1	NOEF Layout	3-106
3.4.4.3.2.2	NOEF As-built Data	3-108
3.4.4.3.2.3	Construction Basis (2015 to 2018)	3-110
3.4.4.3.3	Design Concept.....	3-110
3.4.4.3.3.1	Foundation works	3-115
3.4.4.3.3.2	The Base zone.....	3-120
3.4.4.3.3.3	PAF Core – for PAF and MS-NAFs.....	3-120
3.4.4.3.3.4	Reactive PAF Cells	3-126
3.4.4.3.3.5	The Halo Zone	3-127
3.4.4.3.3.6	The Cover Zone.....	3-127
3.4.4.3.3.7	Water Management System	3-134
3.4.4.3.4	Materials Requirements and Sources	3-137
3.4.4.3.4.1	Topsoil	3-138
3.4.4.3.4.2	Clay.....	3-138
3.4.4.3.4.3	Alluvial Material	3-138
3.4.4.3.4.4	LS-NAF(HC).....	3-139
3.4.4.3.5	Operational Development.....	3-139
3.4.4.3.5.1	Stage construction	3-139
3.4.4.3.5.2	NOEF Schedule	3-144
3.4.4.3.5.3	Construction Controls	3-148
3.4.4.3.5.4	Instrumentation and Monitoring	3-148
3.4.4.3.5.5	Design Standards/Criteria.....	3-150
3.4.4.3.6	Source-pathway-receptor Summary	3-157
3.4.4.4	Domain 3 – TSF	3-158
3.4.4.4.1	Overview of the TSF Solution.....	3-159
3.4.4.4.2	Historical Development	3-160
3.4.4.4.3	Facility Design and Controls	3-161
3.4.4.4.3.1	Design and Staging	3-161
3.4.4.4.3.1	Surface Water Management	3-163
3.4.4.4.3.2	Groundwater.....	3-163
3.4.4.4.3.3	Benign Material Borrow	3-164
3.4.4.4.3.4	Benign Material Stockpile Areas	3-164
3.4.4.4.4	Source-pathway-receptor Summary	3-165

3.4.5	Tailings Rehandling Phase (2038-2047).....	3-167
3.4.5.1	Overview	3-167
3.4.5.2	Domain 1 – Open Cut	3-168
3.4.5.2.1	Open Cut	3-168
3.4.5.2.2	EOEF	3-170
3.4.5.2.3	SOEF.....	3-170
3.4.5.2.4	WOEF.....	3-170
3.4.5.2.5	Source-pathway-receptor Summary	3-171
3.4.5.3	Domain 2 – NOEF.....	3-174
3.4.5.3.1	Facility Design and Controls	3-174
3.4.5.3.2	Source-pathway-receptor Summary	3-174
3.4.5.4	Domain 3 – TSF	3-176
3.4.5.4.1	Facility Design and Controls	3-176
3.4.5.4.1.1	<i>Hydraulic Mining Operations</i>	3-176
3.4.5.4.1.2	<i>Reprocessing</i>	3-178
3.4.5.4.1.3	<i>Tailings Deposition</i>	3-178
3.4.5.4.2	Source-pathway-receptor Summary	3-179
3.4.6	Closure Phase (2048-3017)	3-180
3.4.6.1	Overview	3-180
3.4.6.2	Open Cut Domain	3-181
3.4.6.2.1	Open Cut	3-181
3.4.6.2.2	WOEF.....	3-182
3.4.6.2.3	Other Infrastructure	3-182
3.4.6.2.4	Source-pathway-receptor Summary	3-182
3.4.6.3	NOEF Domain.....	3-184
3.4.6.3.1	Facility Design and Controls	3-184
3.4.6.3.2	Source-pathway-receptor Summary	3-185
3.4.6.4	TSF Domain.....	3-188
3.4.6.4.1	Facility Design and Controls	3-188
3.4.6.4.2	Source-pathway-receptor Summary	3-189
4	Decommissioning, Rehabilitation and Closure	4-1
4.1	Introduction	4-1
4.2	Definitions	4-2
4.3	Rehabilitation Management Units	4-3
4.4	Timing	4-7
4.5	Closure Objectives	4-7
4.6	Post-mining Land Uses	4-8
4.7	Infrastructure to be Retained	4-10
4.8	Key Risks	4-11
4.9	Progressive Remediation of Mine Landforms	4-11
4.10	Proposed Decommissioning and Rehabilitation	4-11
4.10.1	Rehabilitation Management Unit 1: Open Cut.....	4-11
4.10.1.1	Closure Objectives	4-11
4.10.1.2	Risks	4-12
4.10.1.3	Approach	4-13
4.10.1.4	Monitoring.....	4-14

4.10.1.5	Timing	4-15
4.10.2	Rehabilitation Management Unit 2: Overburden Emplacement Facilities	4-15
4.10.2.1	Closure Objectives	4-15
4.10.2.2	Risks	4-15
4.10.2.3	Approach	4-16
4.10.2.4	Monitoring	4-19
4.10.2.5	Timing	4-19
4.10.3	Rehabilitation Management Unit 3: Tailings Storage Facility	4-20
4.10.3.1	Closure Objectives	4-20
4.10.3.2	Risks	4-20
4.10.3.3	Approach	4-20
4.10.3.4	Monitoring	4-21
4.10.3.5	Timing	4-22
4.10.4	Rehabilitation Management Unit 4: Infrastructure Areas	4-22
4.10.4.1	Closure Objectives	4-22
4.10.4.2	Risks	4-23
4.10.4.3	Approach	4-23
4.10.4.4	Monitoring	4-24
4.10.4.5	Timing	4-24
4.10.5	Rehabilitation Management Unit 5: Borrow Pits	4-24
4.10.5.1	Closure Objectives	4-24
4.10.5.2	Risks	4-25
4.10.5.3	Approach	4-25
4.10.5.4	Monitoring	4-25
4.10.5.5	Timing	4-26
4.10.6	Rehabilitation Management Unit 6: Water Dams	4-26
4.10.6.1	Closure Objectives	4-26
4.10.6.2	Risks	4-26
4.10.6.3	Approach	4-26
4.10.6.4	Monitoring	4-27
4.10.6.5	Timing	4-27
4.10.7	Rehabilitation Management Unit 7: Roads	4-27
4.10.7.1	Closure Objectives	4-27
4.10.7.2	Risks	4-27
4.10.7.3	Approach	4-28
4.10.7.4	Monitoring	4-28
4.10.7.5	Timing	4-28
4.10.8	Rehabilitation Management Unit 8: Exploration	4-28
4.10.8.1	Closure Objectives	4-28
4.10.8.2	Risks	4-28
4.10.8.3	Approach	4-29
4.10.8.4	Monitoring	4-29
4.10.8.5	Timing	4-29
4.11	Trials	4-29
4.12	Contingency Plans for Premature or Temporary Closure	4-30
4.12.1	General Strategy for Short-term Care and Maintenance	4-30

4.12.1.1	Open Cut.....	4-30
4.12.1.2	Overburden Emplacement Facilities.....	4-30
4.12.1.3	Tailings Storage Facilities	4-31
4.12.1.4	Infrastructure	4-31
4.12.1.5	Borrow Pits	4-31
4.12.1.6	Water Dams.....	4-31
4.12.1.7	Roads.....	4-31
4.12.1.8	Exploration	4-31
4.12.2	General Strategy for Longer Term Care and Maintenance	4-31
4.12.2.1	Open Cut.....	4-31
4.12.2.2	Overburden Emplacement Facilities.....	4-32
4.12.2.3	Tailings Storage Facility.....	4-32
4.12.2.4	Infrastructure	4-32
4.12.2.5	Borrow Pits	4-32
4.12.2.6	Water Dams.....	4-32
4.12.2.7	Roads.....	4-32
4.12.2.8	Exploration	4-32
4.12.3	Miscellaneous	4-32
4.13	Completion Criteria	4-33
4.14	Performance Reviews	4-33
4.15	Revising the Conceptual Mine Closure Plan	4-34
5	Project Alternatives	5-1
5.1	Introduction	5-1
5.2	Ecologically Sustainable Development.....	5-3
5.2.1	Integration of Economic, Environmental, Social and Equitable Considerations.....	5-3
5.2.2	Precautionary Principle.....	5-4
5.2.3	Inter-generational and Intra-generational Equity.....	5-4
5.2.4	Biodiversity Conservation	5-4
5.2.5	Valuation Mechanisms.....	5-4
5.2.6	Other Project Principles Supporting ESD	5-4
5.2.6.1	Improved Project Design	5-5
5.2.6.1.1	Decreased Project Footprint in Vicinity of McArthur River	5-5
5.2.6.1.2	Flow through Mine Pit Lake	5-5
5.2.6.1.3	Removal of Entire TSF	5-5
5.2.6.2	Risk Assessment Approach to Life of Mine Management	5-5
5.2.6.3	Addressing Closure Risk as Part of Design.....	5-6
5.3	Consideration of Matters of National Environmental Significance	5-6
5.4	Project vs No Project.....	5-6
5.5	Project Domain Alternatives	5-7
5.5.1	Introduction.....	5-7
5.5.2	Domain 1 – Open Cut.....	5-13
5.5.2.1	Design Alternatives.....	5-13
5.5.2.1.1	Small Scale vs Large Scale Open Cut Mining.....	5-14
5.5.2.1.2	Mining Sequencing and Scheduling	5-14
5.5.2.2	Closure and Rehabilitation Planning	5-14
5.5.2.2.1	Key Alternatives	5-14

5.5.2.2.1.1	<i>In-Pit Dumping of Overburden vs No In-Pit Dumping</i>	5-15
5.5.2.2.1.2	<i>In-Pit Disposal of High Pyrite Overburden vs Placement in the NOEF</i>	5-17
5.5.2.2.1.3	<i>In-Pit Tailings Disposal vs Tailings Remaining within the TSF</i>	5-17
5.5.2.2.1.4	<i>Passive Filling Of the Open Cut Final Void vs Active Filling</i>	5-18
5.5.2.2.1.5	<i>Isolated Mine Pit Lake vs Alternatives for Interaction with the McArthur River</i>	5-18
5.5.2.2.2	Closure Alternatives	5-18
5.5.2.2.2.1	<i>Alternative 1 – Isolated Mine Pit Lake with Passive Filling</i>	5-18
5.5.2.2.2.2	<i>Alternative 2 – Isolated Mine Pit Lake with Active Filling</i>	5-20
5.5.2.2.2.3	<i>Alternative 3 – Flow through Mine Pit Lake</i>	5-22
5.5.2.2.2.4	<i>Alternative 4 – Flow through Mine Pit Lake as Secondary Path (Preferred)</i>	5-23
5.5.2.2.2.5	<i>Alternative 5 – Mine Pit Lake with Backwater Interaction</i>	5-25
5.5.2.2.2.6	<i>Alternative 6 – Managed Isolated Mine Pit Lake</i>	5-27
5.5.2.2.2.7	<i>Alternative 7 – Complete Backfill of Final Void</i>	5-28
5.5.2.2.2.8	<i>Alternative 8 – Partial Backfill of Final Void</i>	5-31
5.5.2.3	Multi-criteria Analysis	5-34
5.5.2.3.1	Alternative 1 – Isolated Mine Pit Lake with Passive Filling	5-37
5.5.2.3.2	Alternative 2 – Isolated Mine Pit Lake with Active Filling.....	5-38
5.5.2.3.3	Alternative 3 – Flow through Mine Pit Lake	5-39
5.5.2.3.4	Alternative 4 – Flow through Mine Pit Lake as Secondary Path	5-40
5.5.2.3.5	Alternative 5 – Mine Pit Lake with Backwater Interaction	5-40
5.5.2.3.6	Alternative 6 – Managed Isolated Mine Pit Lake	5-41
5.5.2.3.7	Alternative 7 – Complete Backfill of Final Void.....	5-41
5.5.2.3.8	Alternative 8 – Partial Backfill of Final Void	5-41
5.5.2.4	Preferred Alternative for the Open Cut Domain.....	5-42
5.5.2.5	Alternative Environmental Management Measures for Key Risks.....	5-43
5.5.3	Domain 2 – NOEF	5-43
5.5.3.1	Location Alternatives	5-43
5.5.3.2	Height and Footprint Considerations	5-43
5.5.3.3	Batter Configuration Alternatives	5-46
5.5.3.4	Height/Batter Combinations Assessment	5-48
5.5.3.4.1	Alternative 1a – 140 m High, 1V:2.5H Batter Slope	5-48
5.5.3.4.2	Alternative 1b – 140 m High and Trilinear (1V:2.5/3.5/4.5H) Batter Slope	5-49
5.5.3.4.3	Alternative 1c – 140 m High and 1V:4H Batter Slope.....	5-50
5.5.3.4.4	Alternative 1d – 140 m High and Angle of Repose Slope (1V:1.3H)	5-51
5.5.3.4.5	Alternative 2a – 80 m High and 1V:2.5H Batter Slope.....	5-52
5.5.3.4.6	Alternative 2b – 80 m Height and Trilinear Batter Slope (1V:2.5/3.5/4.5H)	5-53
5.5.3.4.7	Alternative 2c – 80 m High and 1V:4H Batter Slope	5-54
5.5.3.4.8	Alternative 2d – 80 m High and Angle of Repose Slope (1V:1.3H)	5-55
5.5.3.4.9	Preferred Height and Batter Geometry Alternative	5-59
5.5.3.5	Cover System Design	5-59
5.5.3.5.1	Design Alternatives.....	5-59
5.5.3.5.1.1	<i>Alternative 1 – Store-and-Release Cover System</i>	5-61
5.5.3.5.1.2	<i>Alternative 2 – Enhanced Store-and-Release Cover System</i>	5-61
5.5.3.5.1.3	<i>Alternative 3 – Oxygen Barrier Cover System (Preferred Alternative)</i>	5-61
5.5.3.5.1.4	<i>Alternative 4 – Two Barrier Layer Cover System</i>	5-61
5.5.3.5.1.5	<i>Alternative 5 – Bituminous Geomembrane Cover System</i>	5-61

5.5.3.5.2	Assessment of Cover Alternatives	5-62
5.5.3.5.2.1	Alternative 1 – Store-and-Release	5-65
5.5.3.5.2.2	Alternative 2 – Enhanced store and release cover system.....	5-66
5.5.3.5.2.3	Alternative 3 – Oxygen Barrier Cover System.....	5-66
5.5.3.5.2.4	Alternative 4 – Two Barrier Layer Cover System	5-67
5.5.3.5.2.5	Alternative 5 – BGM Layer Cover System.....	5-67
5.5.3.5.3	Selection of Preferred Cover Alternative	5-68
5.5.3.6	Construction and Operational Alternatives.....	5-69
5.5.3.6.1	Alternative Construction Practices Considered	5-69
5.5.3.6.2	Assessment of Alternatives.....	5-69
5.5.3.6.3	Preferred Construction Practices.....	5-70
5.5.3.7	Closure and Rehabilitation Planning	5-70
5.5.3.7.1	NOEF Closure Alternatives	5-70
5.5.3.7.1.1	Alternative 1 – Retaining All Overburden in External OEFs (Preferred Alternative).....	5-70
5.5.3.7.1.2	Alternative 2 – Rehandling of All Overburden Back Into the Open Cut Final Void.....	5-71
5.5.3.7.1.3	Alternative 3 – Rehandling of a Part of the Overburden into the Open Cut Final Void.....	5-71
5.5.3.7.2	Assessment of Closure Alternatives	5-71
5.5.3.7.2.1	Alternative 1 – Retaining all overburden in external OEFs.....	5-75
5.5.3.7.2.2	Alternative 2 – Rehandling of All Overburden Back Into the Open Cut Final Void.....	5-75
5.5.3.7.2.3	Alternative 3 – Rehandling of Part of the Overburden Back Into the Open Cut Void ..	5-76
5.5.3.7.3	Preferred NOEF Closure and Rehabilitation Alternative	5-77
5.5.3.8	Alternative Environmental Management Measures for Key Risks.....	5-78
5.5.4	Domain 3 – TSF	5-78
5.5.4.1	Design Alternatives	5-78
5.5.4.1.1	TSF Alternatives Considered	5-78
5.5.4.1.1.1	Alternative 1 – Slurry Tailings Cells 2 & 3	5-78
5.5.4.1.1.2	Alternative 1a – Slurry Tailings Cells 2 & 3 (with Mud Farming)	5-78
5.5.4.1.1.3	Alternative 2 – Slurry Tailings Cells 1 & 2 (Preferred Alternative)	5-79
5.5.4.1.1.4	Alternative 2a – Slurry Tailings Cells 1 & 2 (with Mud Farming)	5-79
5.5.4.1.1.5	Alternative 3 – Paste Tailings Cells 1 & 2	5-79
5.5.4.1.1.6	Alternative 4 – Filtered Tailings	5-79
5.5.4.1.1.7	Alternative 5 – Filtered Tailings Co-Disposal	5-79
5.5.4.1.2	Assessment of TSF Alternatives	5-79
5.5.4.1.2.1	Alternative 1 – Slurry Tailings Cells 2 & 3	5-83
5.5.4.1.2.2	Alternative 1a – Slurry Tailings Cells 2 & 3 (with Mud Farming)	5-83
5.5.4.1.2.3	Alternative 2 – Slurry tailings cells 1 & 2	5-84
5.5.4.1.2.4	Alternative 2a – Slurry Tailings Cells 1 & 2 (with Mud Farming)	5-84
5.5.4.1.2.5	Alternative 3 – Paste Tailings Cells 1 & 2	5-85
5.5.4.1.2.6	Alternative 4 – Filtered Tailings	5-85
5.5.4.1.2.7	Alternative 5 – Filtered Tailings Co-Disposal	5-85
5.5.4.1.3	Preferred TSF Design.....	5-86
5.5.4.2	Closure and Rehabilitation Planning	5-86
5.5.4.2.1	TSF Closure Alternatives Considered	5-86
5.5.4.2.2	Assessment of Alternatives.....	5-87
5.5.4.2.2.1	Alternative 1 – Tailings to Remain at the TSF with Cover System Installed.....	5-91
5.5.4.2.2.2	Alternative 2 – Re-Handle Tailings Back Into Open Cut Final Void	5-92

5.5.4.2.2.3	<i>Alternative 3 – Reprocessing Of Tailings and Placement Back into Open Cut Final Void (Preferred Alternative)</i>	5-93
5.5.4.2.3	Preferred TSF Closure and Rehabilitation Alternative.....	5-94
5.5.4.3	Alternative Environmental Management Measures for Key Risks.....	5-94
5.6	Site-Wide Alternatives	5-95
5.6.1	Water Management	5-95
5.6.2	Sources of Benign Material	5-95
5.6.2.1	Clay, Alluvium and Topsoil Materials	5-96
5.6.2.2	LS-NAF(HC) Material.....	5-96
5.7	Summary of Preferred Alternatives	5-96
5.7.1	Open Cut.....	5-96
5.7.2	NOEF	5-97
5.7.3	TSF	5-98

13.1.3.3.1	Glencore Emission Reduction Pilots and Projects	13-7
13.1.3.3.2	MRM Emission Reduction	13-7
13.2	Existing Environment	13-7
13.2.1	Local Setting	13-7
13.2.2	Sensitive Receptor Locations	13-8
13.2.3	Sources of Air Emissions	13-11
13.2.4	Existing Air Quality Monitoring	13-11
13.2.4.1	Low Volume Air Samplers	13-11
13.2.4.1.1	Particulate Dust (PM ₁₀)	13-11
13.2.4.1.2	Particulate Lead	13-15
13.2.4.1.3	Particulate Zinc	13-15
13.2.4.2	Depositional Dust	13-15
13.2.4.3	Sulphur Dioxide	13-18
13.2.5	Climate	13-19
13.3	Air Quality Impact Assessment	13-23
13.3.1	Risk Identification	13-23
13.3.1.1	Sources of Air Emissions and Potential for Impact	13-23
13.3.1.1.1	Particulate Matter	13-23
13.3.1.1.2	Sulphur Dioxide	13-23
13.3.2	Risk Evaluation	13-24
13.3.2.1	Emission Estimates	13-24
13.3.2.1.1	Particulate Matter	13-24
13.3.2.1.2	Lead and Zinc	13-26
13.3.2.2	Modelling Methodology	13-26
13.3.2.2.1	Meteorology Modelling	13-26
13.3.2.2.2	Dispersion Modelling	13-26
13.3.2.2.3	Background Pollutant Levels	13-27
13.3.2.2.4	Modelling Scenarios	13-27
13.3.2.3	Dispersion Modelling Results	13-33
13.3.2.3.1	Predicted Particulate Matter Levels	13-33
13.3.2.3.1.1	Further Analysis of 24 hour Average PM ₁₀ Concentrations	13-41
13.3.2.3.2	Predicted Lead Concentrations	13-45
13.3.2.3.3	Predicted Zinc Concentrations	13-49
13.3.2.3.4	Sulphur Dioxide	13-53
13.4	Risk Mitigation Measures	13-63
13.4.1	Particulate Matter	13-63
13.4.1.1	Monitoring	13-64
13.4.2	Sulphur Dioxide	13-67
13.5	Greenhouse Gas Assessment	13-69

13.5.1	Greenhouse Gas Emissions.....	13-69
13.5.2	Greenhouse Gas Minimisation measures	13-70
13.5.3	Climate Impact Assessment	13-70
13.5.3.1	Methodology	13-71
13.5.3.2	Results	13-71
13.6	Conclusions and Residual Risk.....	13-72
14	Health and Safety	14-1
14.1	Introduction	14-1
14.2	HSEC MS	14-2
14.2.1	Governance and HSEC Frameworks.....	14-2
14.2.2	HSEC Management Framework	14-3
14.2.3	HSEC MS Standard.....	14-4
14.3	Project Risk Management Framework	14-7
14.4	Hazard Identification	14-7
14.4.1	MRM Current Operations.....	14-7
14.4.1.1	Operational Hazards.....	14-7
14.4.1.2	Decommissioning and Rehabilitation Hazards	14-8
14.4.2	The Project	14-8
14.5	Risk Assessment.....	14-10
14.5.1	MRM Current Operations.....	14-10
14.5.2	The Project	14-10
14.6	RISK MITIGATION STRATEGIES	14-61
14.6.1	MRM Current Operations.....	14-61
14.6.1.1	System based mitigation strategies	14-61
14.6.1.1.1	SafeWork	14-61
14.6.1.1.1.1	Life-saving Behaviours	14-61
14.6.1.1.1.2	Fatal Hazard Protocols	14-61
14.6.1.1.2	HSEC System Responsibilities.....	14-61
14.6.1.1.3	HSEC System Representatives and Committees.....	14-62
14.6.1.1.4	Occupational Health Management	14-62
14.6.1.1.5	Behavioural Safety Management	14-63
14.6.1.1.6	Induction and Training.....	14-64
14.6.1.1.6.1	Employees	14-64
14.6.1.1.6.2	Contractors and Visitors.....	14-65
14.6.1.1.7	Incident Reporting and Investigation.....	14-65
14.6.1.1.8	Emergency Preparedness	14-66
14.6.1.1.9	Emergency Response Plan	14-66
14.6.1.2	HAZARD SPECIFIC MITIGATION STRATEGIES	14-67
14.6.1.2.1	Traffic Incidents.....	14-67
14.6.1.2.2	Physical Interaction with Machinery	14-67
14.6.1.2.3	Hazardous Substances and Dangerous Goods.....	14-68
14.6.1.2.4	Explosive Handling, Blasting and Misfires.....	14-69
14.6.1.2.5	Power Infrastructure and High Voltage Exposure	14-69
14.6.1.2.6	Working at Heights and Falling Objects	14-69
14.6.1.2.7	Manual Handling	14-70
14.6.1.2.8	Confined Space	14-70

14.6.1.2.9	Heat.....	14-70
14.6.1.2.10	Noise and Vibration.....	14-70
14.6.1.2.11	Spontaneous Combustion	14-71
14.6.1.2.12	Odour.....	14-71
14.6.1.2.13	Particulates and Gas/Vapours	14-72
14.6.1.2.13.1	Lead.....	14-72
14.6.1.2.13.2	Sulphur Dioxide	14-75
14.6.1.2.13.3	Sulphur Dioxide Monitoring.....	14-75
14.6.1.2.14	Groundwater Quality	14-76
14.6.1.2.15	Surface Water Quality.....	14-76
14.6.1.2.16	Use of Process Water.....	14-77
14.6.1.2.17	Potable Water Supply	14-77
14.6.1.2.18	Waste.....	14-77
14.6.1.2.19	Food Hygiene.....	14-78
14.6.1.2.20	Pest Management and Disease Vectors	14-78
14.6.1.2.21	Wildlife	14-78
14.6.1.2.22	Security and Personal Protection Equipment.....	14-78
14.6.2	The Project	14-79
14.6.2.1	Spontaneous Combustion (Open Cut).....	14-79
14.6.2.2	Spontaneous Combustion (NOEF)	14-80
14.6.2.3	Piping Failure of TSF Embankment	14-80
14.6.2.4	Spontaneous Combustion (TSF)	14-80
14.6.2.5	TSF Embankment Failure due to Seismic Events	14-80
14.6.2.6	TSF Embankment Failure due to Flooding of Surprise Creek.....	14-81
14.6.2.7	Tailings Face or Embankment Failure due to Hydraulic Mining.....	14-81
14.6.2.8	Risk to Unauthorised Third Parties Post-Closure	14-81
14.7	Communication Strategy	14-81
14.8	Summary/Conclusions	14-82
15	Environmental Management Plan.....	15-1
15.1	Purpose and Scope	15-1
15.2	Environmental Management Framework Overview	15-1
15.2.1	Risk Management Framework	15-2
15.2.2	Management Systems.....	15-2
15.2.3	Environmental Incident Management	15-2
15.2.4	Environmental Training.....	15-2
15.2.5	Environmental Communication	15-3
15.2.5.1	Internal Stakeholder Communication (within McArthur River Mining).....	15-3
15.2.5.2	External Stakeholder Communication.....	15-3
15.2.6	Responsibilities	15-3
15.2.7	Performance Indicators	15-6
15.2.8	Corrective Actions and Contingency Arrangements	15-6
15.2.9	Monitoring Requirements.....	15-6
15.2.10	Reporting and Auditing.....	15-7
15.2.10.1	Audits.....	15-7
15.2.10.1.1	External Audits.....	15-7
15.2.10.1.2	Internal audits.....	15-7

15.2.10.2	Incident Reporting and Non-conformance	15-8
15.2.10.3	Complaints Register	15-8
15.2.10.4	Corporate Environmental Performance Reporting.....	15-8
15.3	Existing Environmental Plans, Procedures and Monitoring Programs	15-8
15.4	Environmental Management Plans.....	15-13
15.4.1	Overview.....	15-13
15.4.2	Management Elements.....	15-13
15.4.2.1	Water Resources Management Plan.....	15-13
15.4.2.2	Biodiversity Management Plan.....	15-19
15.4.2.3	Overburden Placement Management Plan	15-24
15.4.2.4	Cultural Heritage Management Plan	15-27
15.4.2.5	Socio-economic Management Plan.....	15-29
15.4.2.6	Air Quality Management Plan.....	15-30
15.4.2.7	Health and Safety Management Plan.....	15-33

Appendices

Appendix A	Final Terms of Reference
Appendix B	Terms of Reference Cross Reference Table
Appendix C	EIS Project Team
Appendix D	Climate Change Assessment Methodology
Appendix E	Conceptual Model Report
Appendix F	Failure Modes and Effects Analysis Report
Appendix G	Final Risk Assessment Workshop Report
Appendix H	NOEF Historical Construction and Drilling Report
Appendix I	MRM NOEF 7.5m Assessment Case Report
Appendix J	NOEF Cover System and Landform Design Report
Appendix K	Erosion Assessment for OEF Landform Configurations
Appendix L	Kinetic Geochemistry Report
Appendix M	Static Geochemistry Report
Appendix N	Geotechnical Assessment Report
Appendix O	NOEF Closure Monitoring System Report
Appendix P	NOEF Mine Drainage Report
Appendix Q	NOEF Mitigation Options Report
Appendix R	TSF – Life of Mine Plan
Appendix S	Conceptual Mine Closure Plan
Appendix T	Groundwater Impact Assessment Report – Part 1
Appendix T	Groundwater Impact Assessment Report – Part 2

Appendix T	Groundwater Impact Assessment Report – Part 3
Appendix U	Surface Water Impact Assessment Report
Appendix V	Final Void Limnology Assessment Report
Appendix W	Aquatic Ecology Impact Assessment Report
Appendix X	Terrestrial Ecology Impact Assessment Report
Appendix Y	Stakeholder Consultation Report
Appendix Z	Economic Impact Assessment Report
Appendix AA	Air Quality Impact Assessment Report
Appendix AB	EIS Commitments
Appendix AC	Tailings Deposition into Open Pit Consolidation Modelling
Appendix AD	NOEF Surface Water Management Sediment Dams and Stilling Basins
Appendix AE	Borrow Pit and NOEF Subsoil Drainage Designs
Appendix AF	Spontaneous Combustion Technical Report
Appendix AG	Borrow Pit Design Process Guidelines
Appendix AH	MRM Clay Borrow Areas
