8.1 Abbreviations

Table 36 Abbreviations

Anagram	Expansion
ACS	Australian Customs Service
AFFA	Commonwealth Department of Agriculture, Fisheries and Forestry
AIHW	Australian Institute of Health and Welfare
AHD	Australian Height Datum
AMSA	Australian Marine Safety Authority
AQIS	Australian Quarantine Inspection Service
CO	Carbon Monoxide
DCC	Darwin City Council
DEC	Department of Environment and Conservation
DHCS	Department of Health and Community Services
DPC	Darwin Port Corporation
DPI	Department of Planning and Infrastructure
EMP	Environmental Management Plan
EPA	Environmental Protection Authority
EPBC	Environmental Protection and Biodiversity Conservation
MARPOL	Marine Pollution
NAQS	Northern Australia Quarantine Strategy
NEPC	National Environmental Protection Council
NEPM	National Environmental Protection Measures
NES	National Environmental Significance
NPI	National Pollutant Inventory
OEH	Office of Environment and Heritage
PAH	Polycyclic Aromatic Hydrocarbons
PM	Particulate Matter
POP	Persistent Organic Pollutant
QWTF	Quarantine Waste Treatment Facility

Anagram	Expansion
RDH	Royal Darwin Hospital
SEPP-AQM	State Environment Protection Policy – Air Quality Management
TCLP	Toxicity Characteristics Leaching Procedure
TEOM	Tapered Element Oscillating Microbalance
TPWC	Territory Parks and Wildlife Conservation
WHO	World Health Organisation
UNCLOS	United Nations Convention on the Law of the Sea
UNFCCC	United Nations Framework Convention on Climate Change

8.2 Glossary

Table 37 Glossary

Term	Definition
Arbovirus	Anthropod-borne virus that is transmitted between vertebrate hosts via anthropods acting as an intermediate vectors. Arboviruses multiply in both the vector and host.
Biomedical Waste	See Clinical and Related Waste
Clinical and Related Waste	Clinical and Related Waste is that waste which has the potential to cause injury, infection or offence, and includes sharps, human tissue, laboratory waste, animal waste resulting from medical, dental or veterinary research or treatment, that has the potential to cause disease: or any other waste, arising from any source, as specified by the establishment. Related wastes are defined as wastes within the waste stream, which constitute, or are contaminated with cytotoxic drugs, chemicals, or pharmaceuticals.
MARPOL 73/78	International Convention for the Prevention of Pollution from Ships 1973 (as amended in 1978) designed to prevent marine pollution and control the dumping of waste at sea, in part, by ensuring that appropriate waste management facilities are available in major ports.
PM2.5	Particulate matter of diameter less than 2.5 microns.
PM10	Particulate matter of diameter less than 10 microns.
Quarantine Waste	is any material foreign to a region or country that is capable of being a host to insects, helminths or other parasites, diseases (e.g. bacteria, viruses, fungi, prions, etc), weeds, or any other organisms that are not existent, or prevalent, in that region or country, and that are capable of being a threat to the health and well being of indigenous or local ecosystems, people, or local plant and/or animal industries.
Related Waste	in the context of quarantine wastes, are materials associated with quarantine wastes, or wastes, depending on the standard of segregation applied, that may

Term	Definition
	or may not contain quarantine wastes. Related wastes may also constitute wastes with similar characteristics or hazards (e.g. biohazards associated with clinical and related wastes), or potentially hazardous wastes generated within the operational precincts of the DPC and Darwin Airport, that can be managed and treated in the same way as quarantine wastes in order to protect public health and the environment. Non-quarantine designated wastes from potentially high risk sources where the competent authority (e.g. DPC, ACS, AQIS, AMSA, EPA, DHCS) deems the waste to be of potentially high risk due to its origin, or nature, may also be considered to be related wastes.
