Subject: Singleton Station Horticulture Project - Environment Impact Assessment
Date: Tuesday, 12 September 2023 9:30:19 PM

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

I am currently spending some time caring for my two grandchildren and their family in Alice Springs. Until recently I lived and worked here for 10 years. Some of that time we lived and worked on a Central Australian Aboriginal Community.

I and many others are seriously concerned about the long term impact of decisions on the quality and life for my grandchildren by this Singleton Water Proposal.

This Singleton horticulture proposal also poses risk of serious, irreversible environmental harm including to groundwater dependent ecosystems, sacred sites, habitat for threatened species, including the bilby.

Dry land environments in Australia are already undergoing ecosystem collapse from the impacts of agriculture and climate change. The substantial groundwater extraction associated with this Project, as well as the land clearing it requires, will further threaten these at-risk ecosystems that will be essential to the survival of all life in the years to come.

The terms of reference for the Environmental Impact Assessment must reflect the concerns and interests of Traditional Owners and the public by protecting all groundwater dependent ecosystems. The level of protection should not follow the advice from NT government agencies which does not reflect the critical importance of these areas.

Thank you for taking the time to consider this submission.

Yours sincerely,
Chris Hawke
